Cut & Prepare the Pieces

GET ACCURATE CUTS AND PREP TO BUILD A COLLAR
THAT LOOKS PROFESSIONAL AND LASTS.

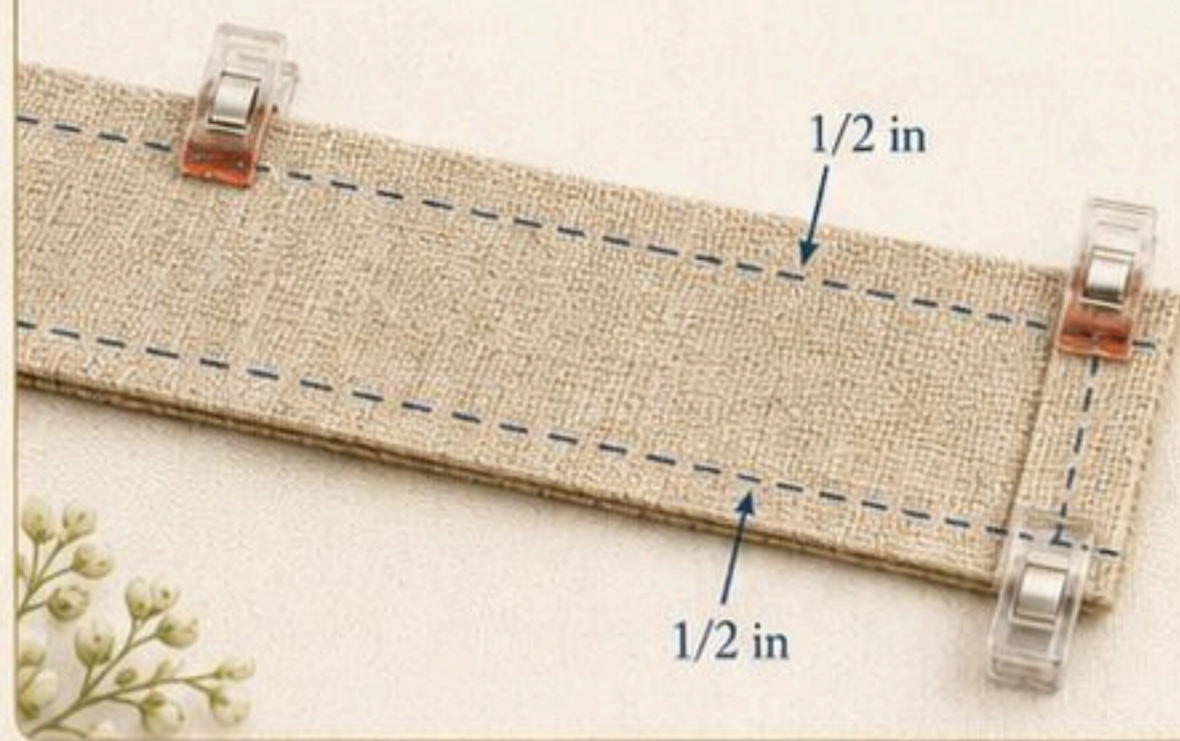

- 1** Cut the outer fabric strip, wide lower ribbon, narrow upper ribbon, and nylon webbing using the size chart.

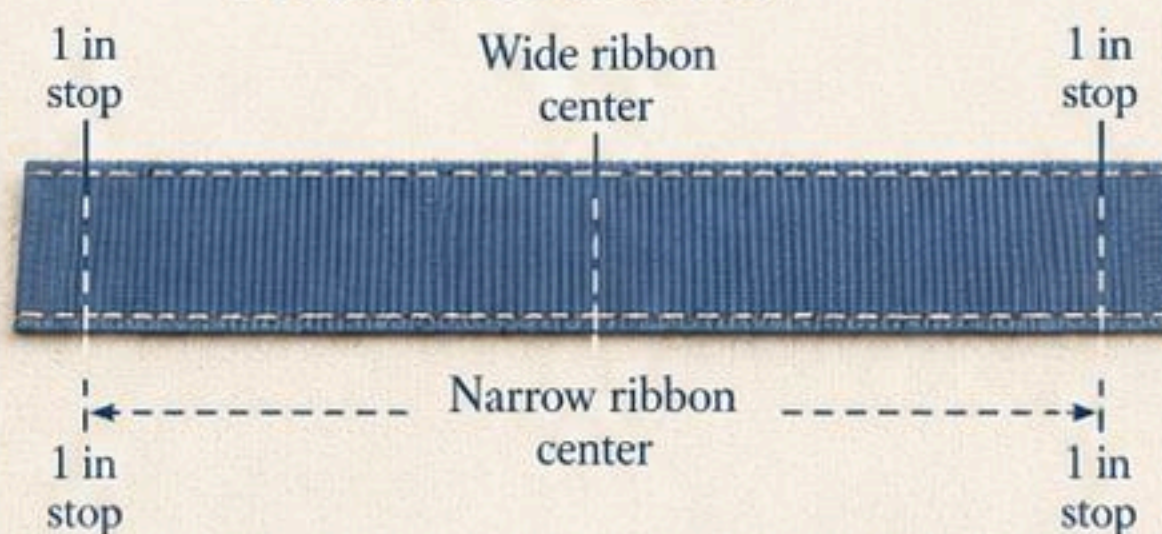

- 2** Lightly heat-seal the nylon webbing and both ribbon ends to prevent fraying.

- 3** Press the outer fabric strip: fold each long side inward by 1/2 in, and fold each short end under by 1/2 in.

- 4** Mark the center line for the wide ribbon, then mark the center line for the narrow ribbon placement, and mark stop points so both ribbons begin and end about 1 in from each short end.

SELLER TIP

Keep all ribbon ends square and all prep accurate so the collar finishes neatly.

10-Page Tutorial

Layer the Ribbons

BUILD THE DOUBLE-RIBBON PANEL

1

Place the wide dusty-blue lower ribbon centered along the prepared outer fabric strip, leaving about 1 in clear at both short ends.

2

Center the narrow pale-powder-blue top ribbon directly over the wide lower ribbon.

3

Use clips or pins to hold both ribbons flat, straight, and evenly centered.

4

Check that the reveal of the wide ribbon is even on both sides of the narrow ribbon from end to end.

FINISHED LAYERED PANEL (PRE-SEWING)

Careful alignment creates depth and style—
it's the secret to a polished, professional collar.

10-Page Tutorial

Sew the Double Ribbon Panel

1

Topstitch close to the left long edge of the narrow top ribbon from end to end.

2

Topstitch close to the right long edge of the narrow top ribbon from end to end.

3

Stitch close to the left outer long edge of the wide lower ribbon.

4

Stitch close to the right outer long edge of the wide lower ribbon.

COMPLETED RIBBON PANEL

NOTE

Straight, parallel stitching gives your collar a polished boutique finish.

Build the Collar Strap

CREATE A STRONG, BEAUTIFUL FOUNDATION

1

Slide the 1 in nylon webbing inside the stitched fabric strip until it is centered.

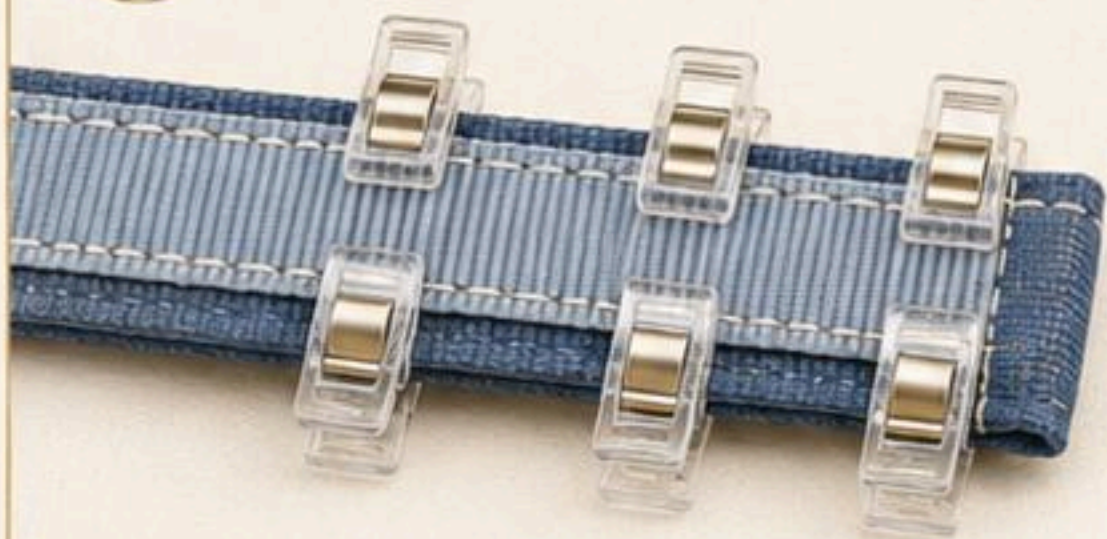

2

Fold the short ends neatly over the webbing so no raw edges show.

3

Hold the strap closed around the webbing using clips.

4

Topstitch close to both long edges and neatly across the short ends to make the finished strap.

COMPLETED STRAP (BEFORE HARDWARE)

NOTE

Even topstitching keeps the strap strong, secure, and beautiful—essential for collars that look handmade and sell well.

Add the Hardware

FOLLOW THE HARDWARE ORDER BELOW

- 1 Thread one end of the strap through the triglide slider, fold back 1.5 in, and stitch securely.

- 2 Thread the opposite end through the male side-release buckle and stitch a secure box-X.

- 3 Thread the free end through the D-ring, then through the female side-release buckle.

- 4 Bring the free end back through the triglide to create the adjustable tail.

Check that the collar adjusts smoothly to
S 10–14 in, M 14–18 in, and L 18–22 in.

10-Page Tutorial

Finish the Collar

- 1 Fasten the collar and lay it flat so you can inspect the overall shape.

- 2 Check that both ribbon layers run straight through the center and that all stitch lines are even.

- 3 Trim loose threads and reinforce any weak stitching if needed, especially near the hardware folds.

- 4 Give the collar a final light press so the strap lies smooth and polished.

A smooth strap and well-centered ribbon layers make the finished collar look professional.

10-Page Tutorial

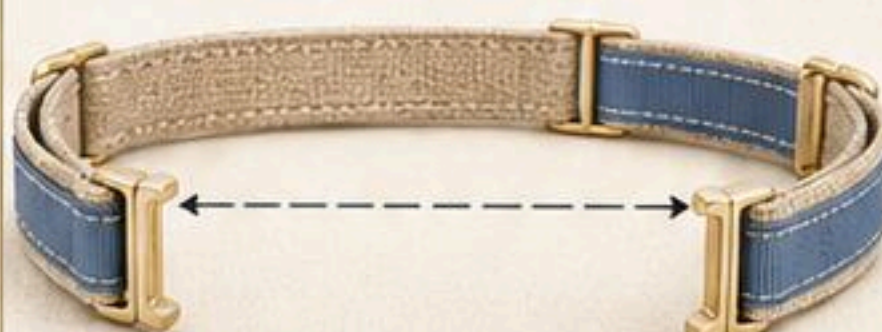

Check the Sizes & Quality Check

- 1** Set the collar to its smallest setting and measure the inside circumference flat.

Example: 10 in

- 2** Set the collar to its largest setting and measure the inside circumference flat.

Example: 22 in

- 3** Compare the finished collar to the size chart and label it clearly for selling.
