

Fire Dragon Paracord Pet Collar

*A Step-by-Step
Craft Guide*

Premium DIY Pattern • Beginner-Friendly Layout

Welcome

LET'S CREATE SOMETHING
Extraordinary

In this guide, you'll learn how to create a handmade paracord pet collar using the Fire Dragon knot technique.

Follow the steps in order, keep your cords even, and tighten each knot gradually for the cleanest result.

This pattern combines bold texture and soft color for a beautiful finished collar.

Materials Needed

Gather the following materials before you begin creating your Fire Dragon paracord pet collar.

550 paracord in silver gray, cream, pastel blue, pastel yellow, pastel pink, and gray

Beading thread or string for beads

Pearl-style beads

Side-release buckle

20 mm D-ring

Adhesive tape

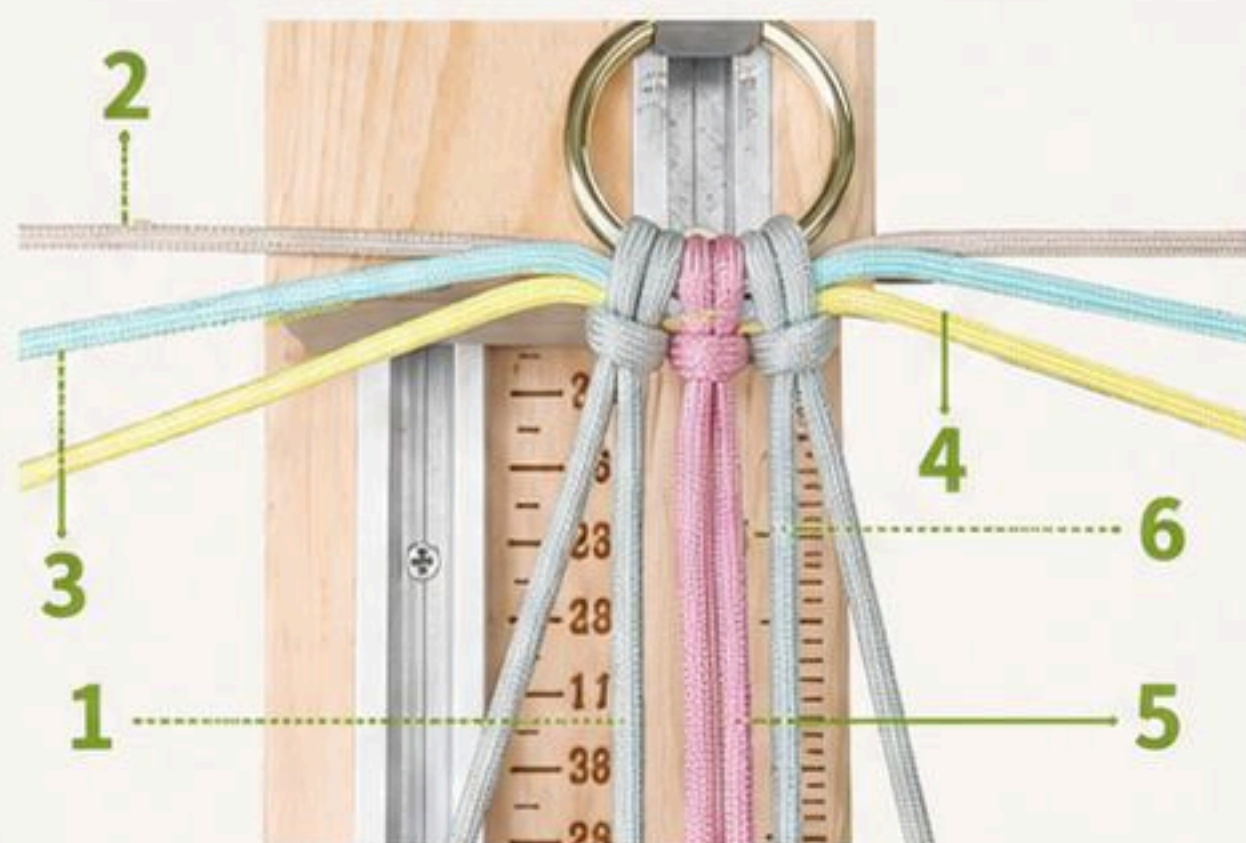

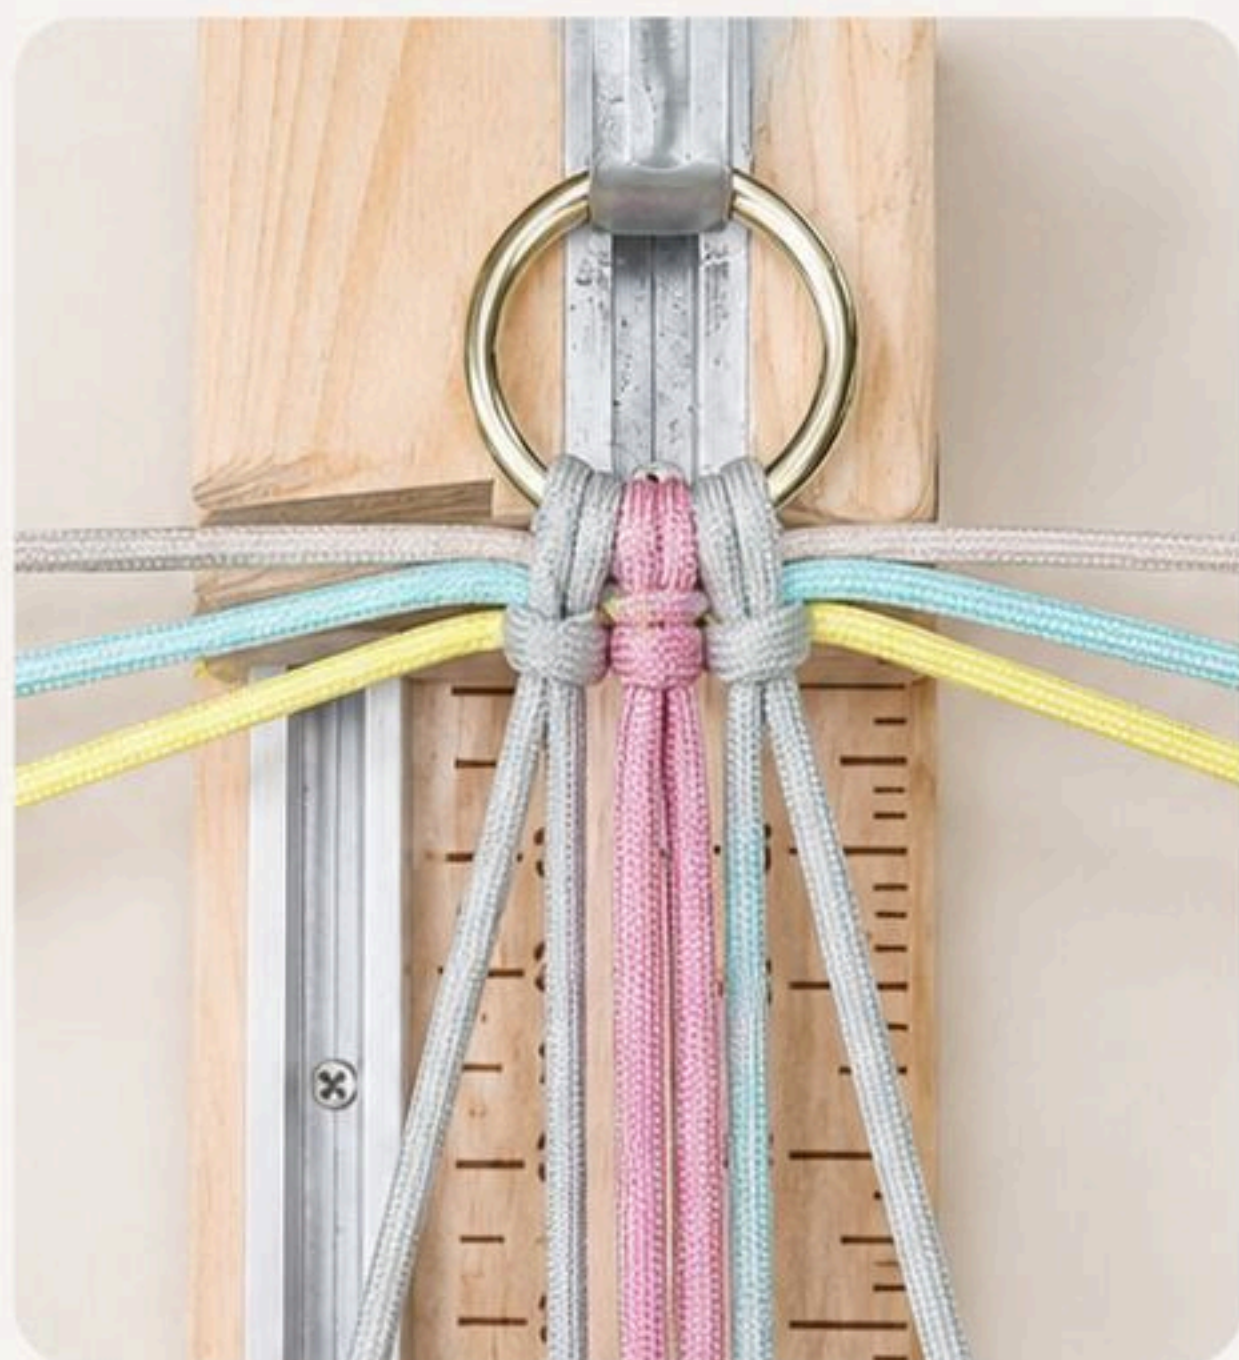

Measuring tape

Scissors

Lighter

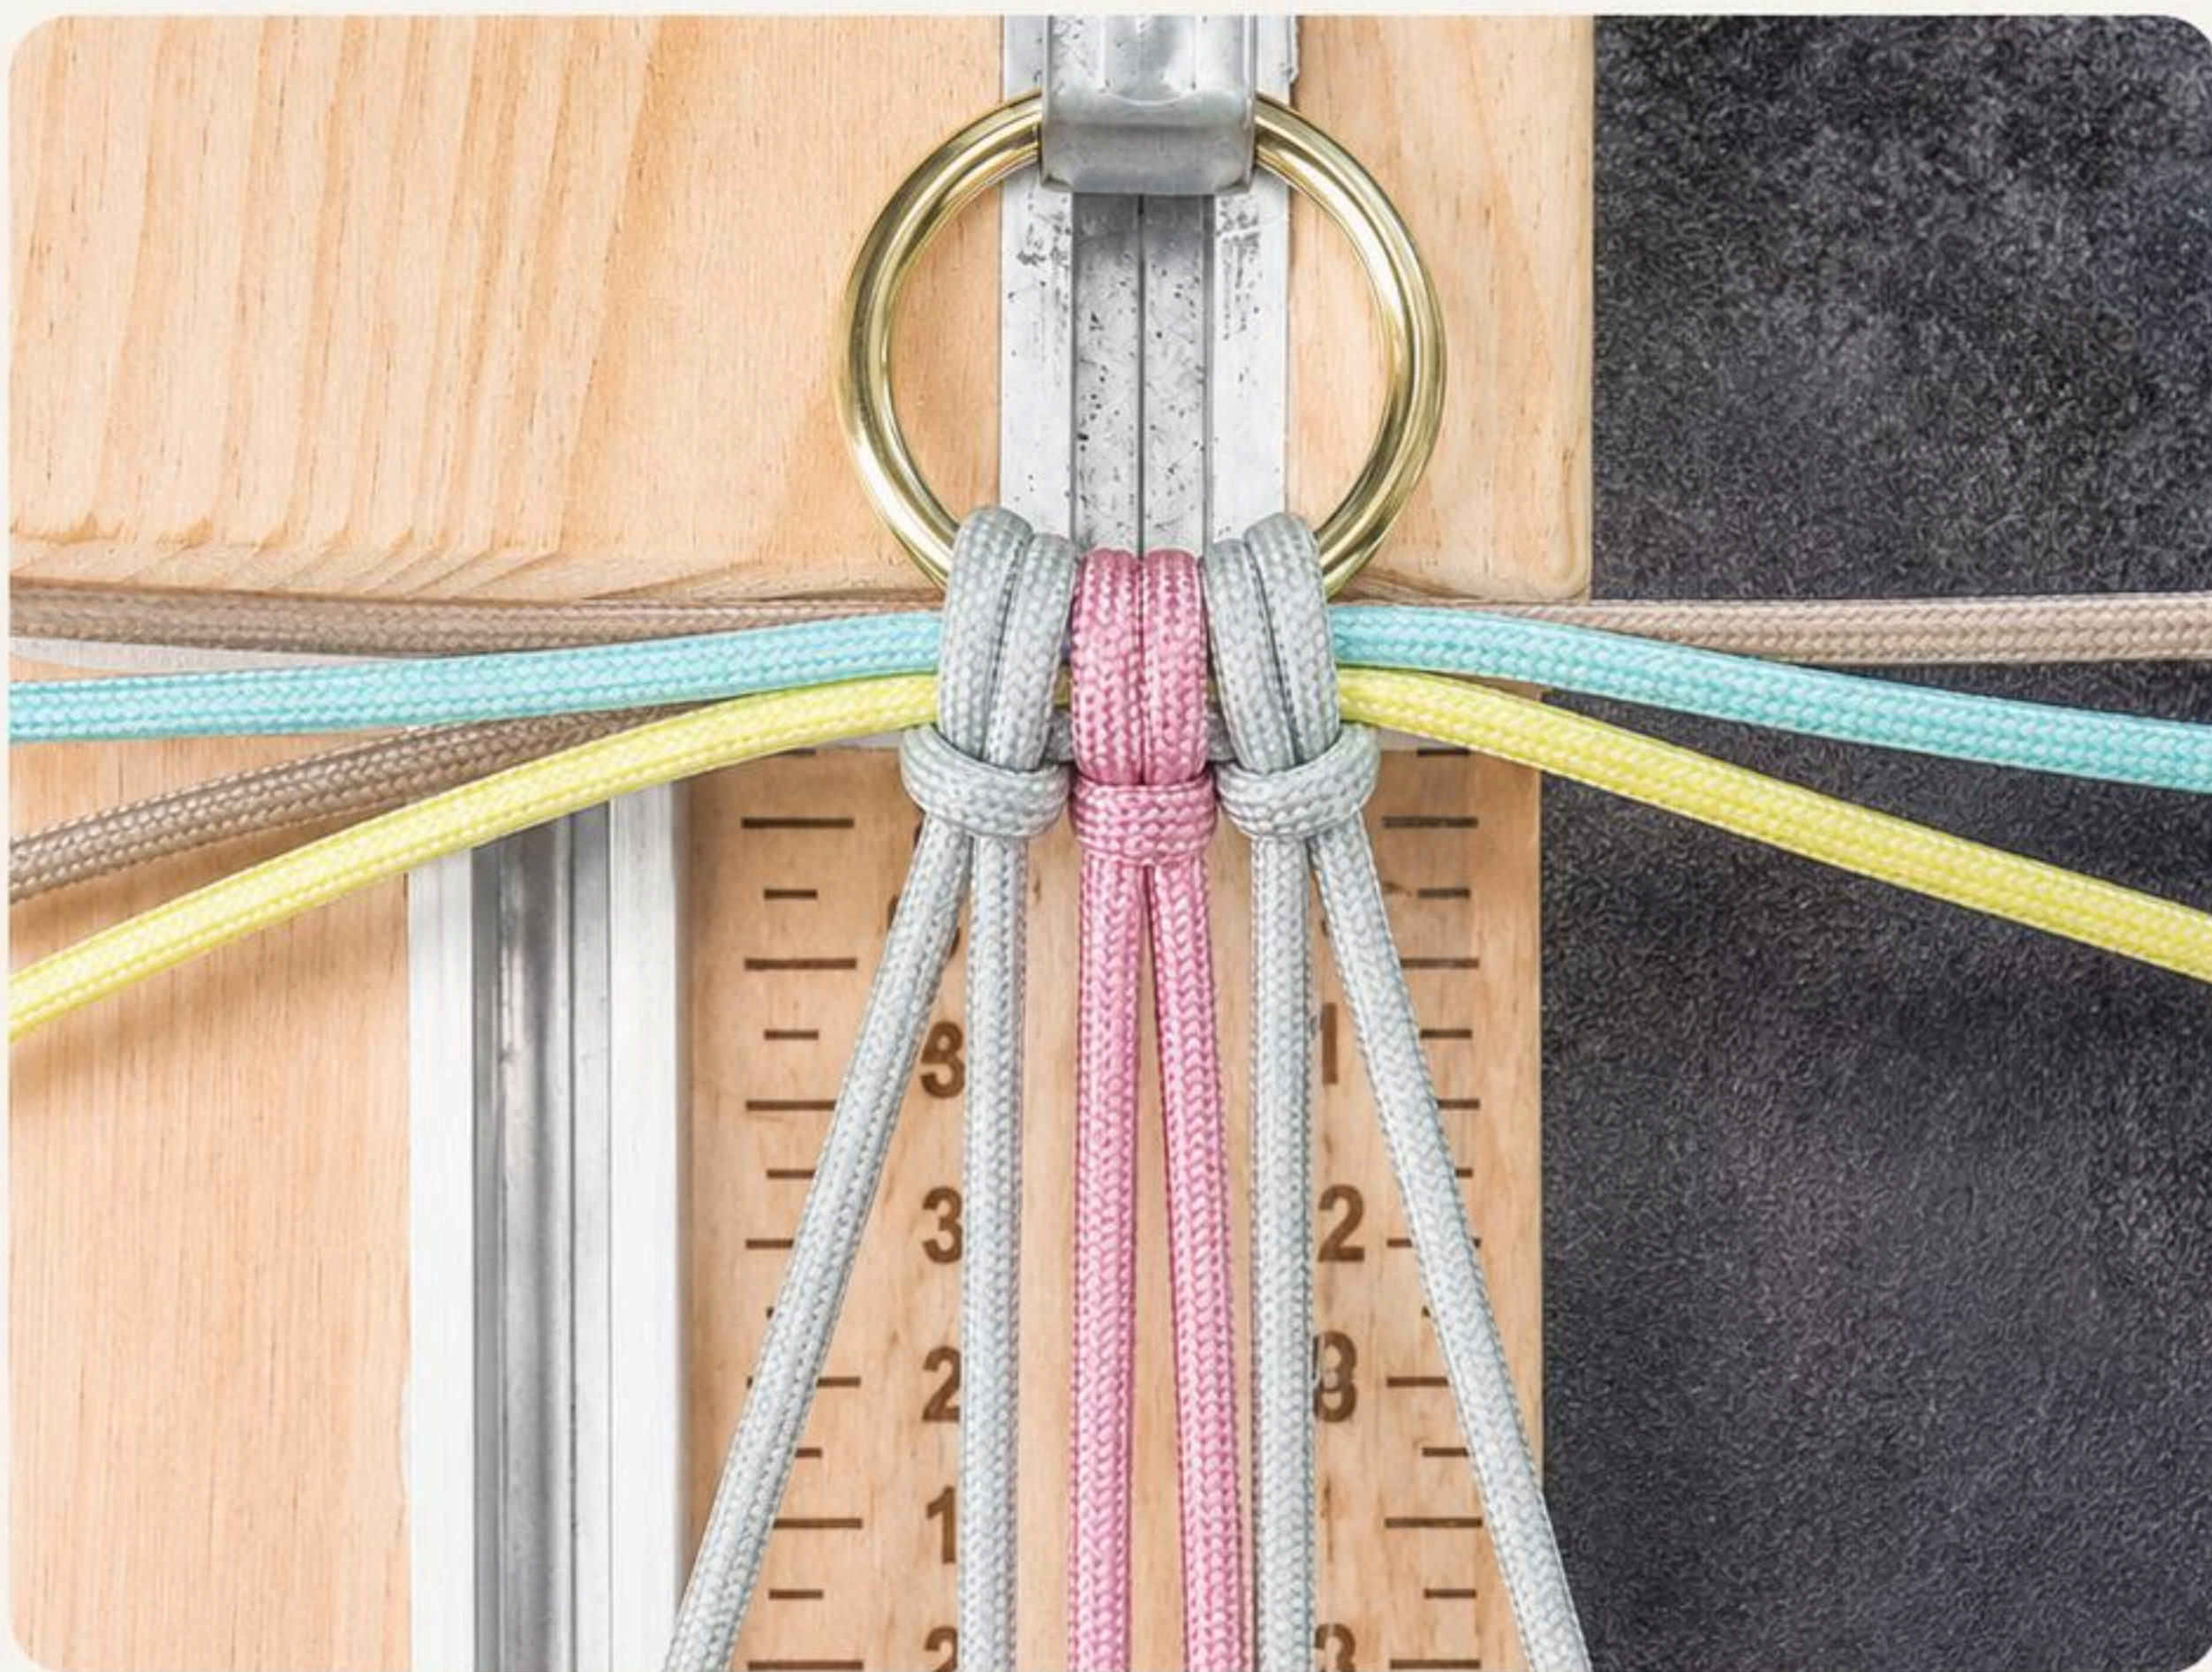

Arrange the cords in the same order shown in the setup image *before you begin knotting.*

Step 1

Prepare your cords

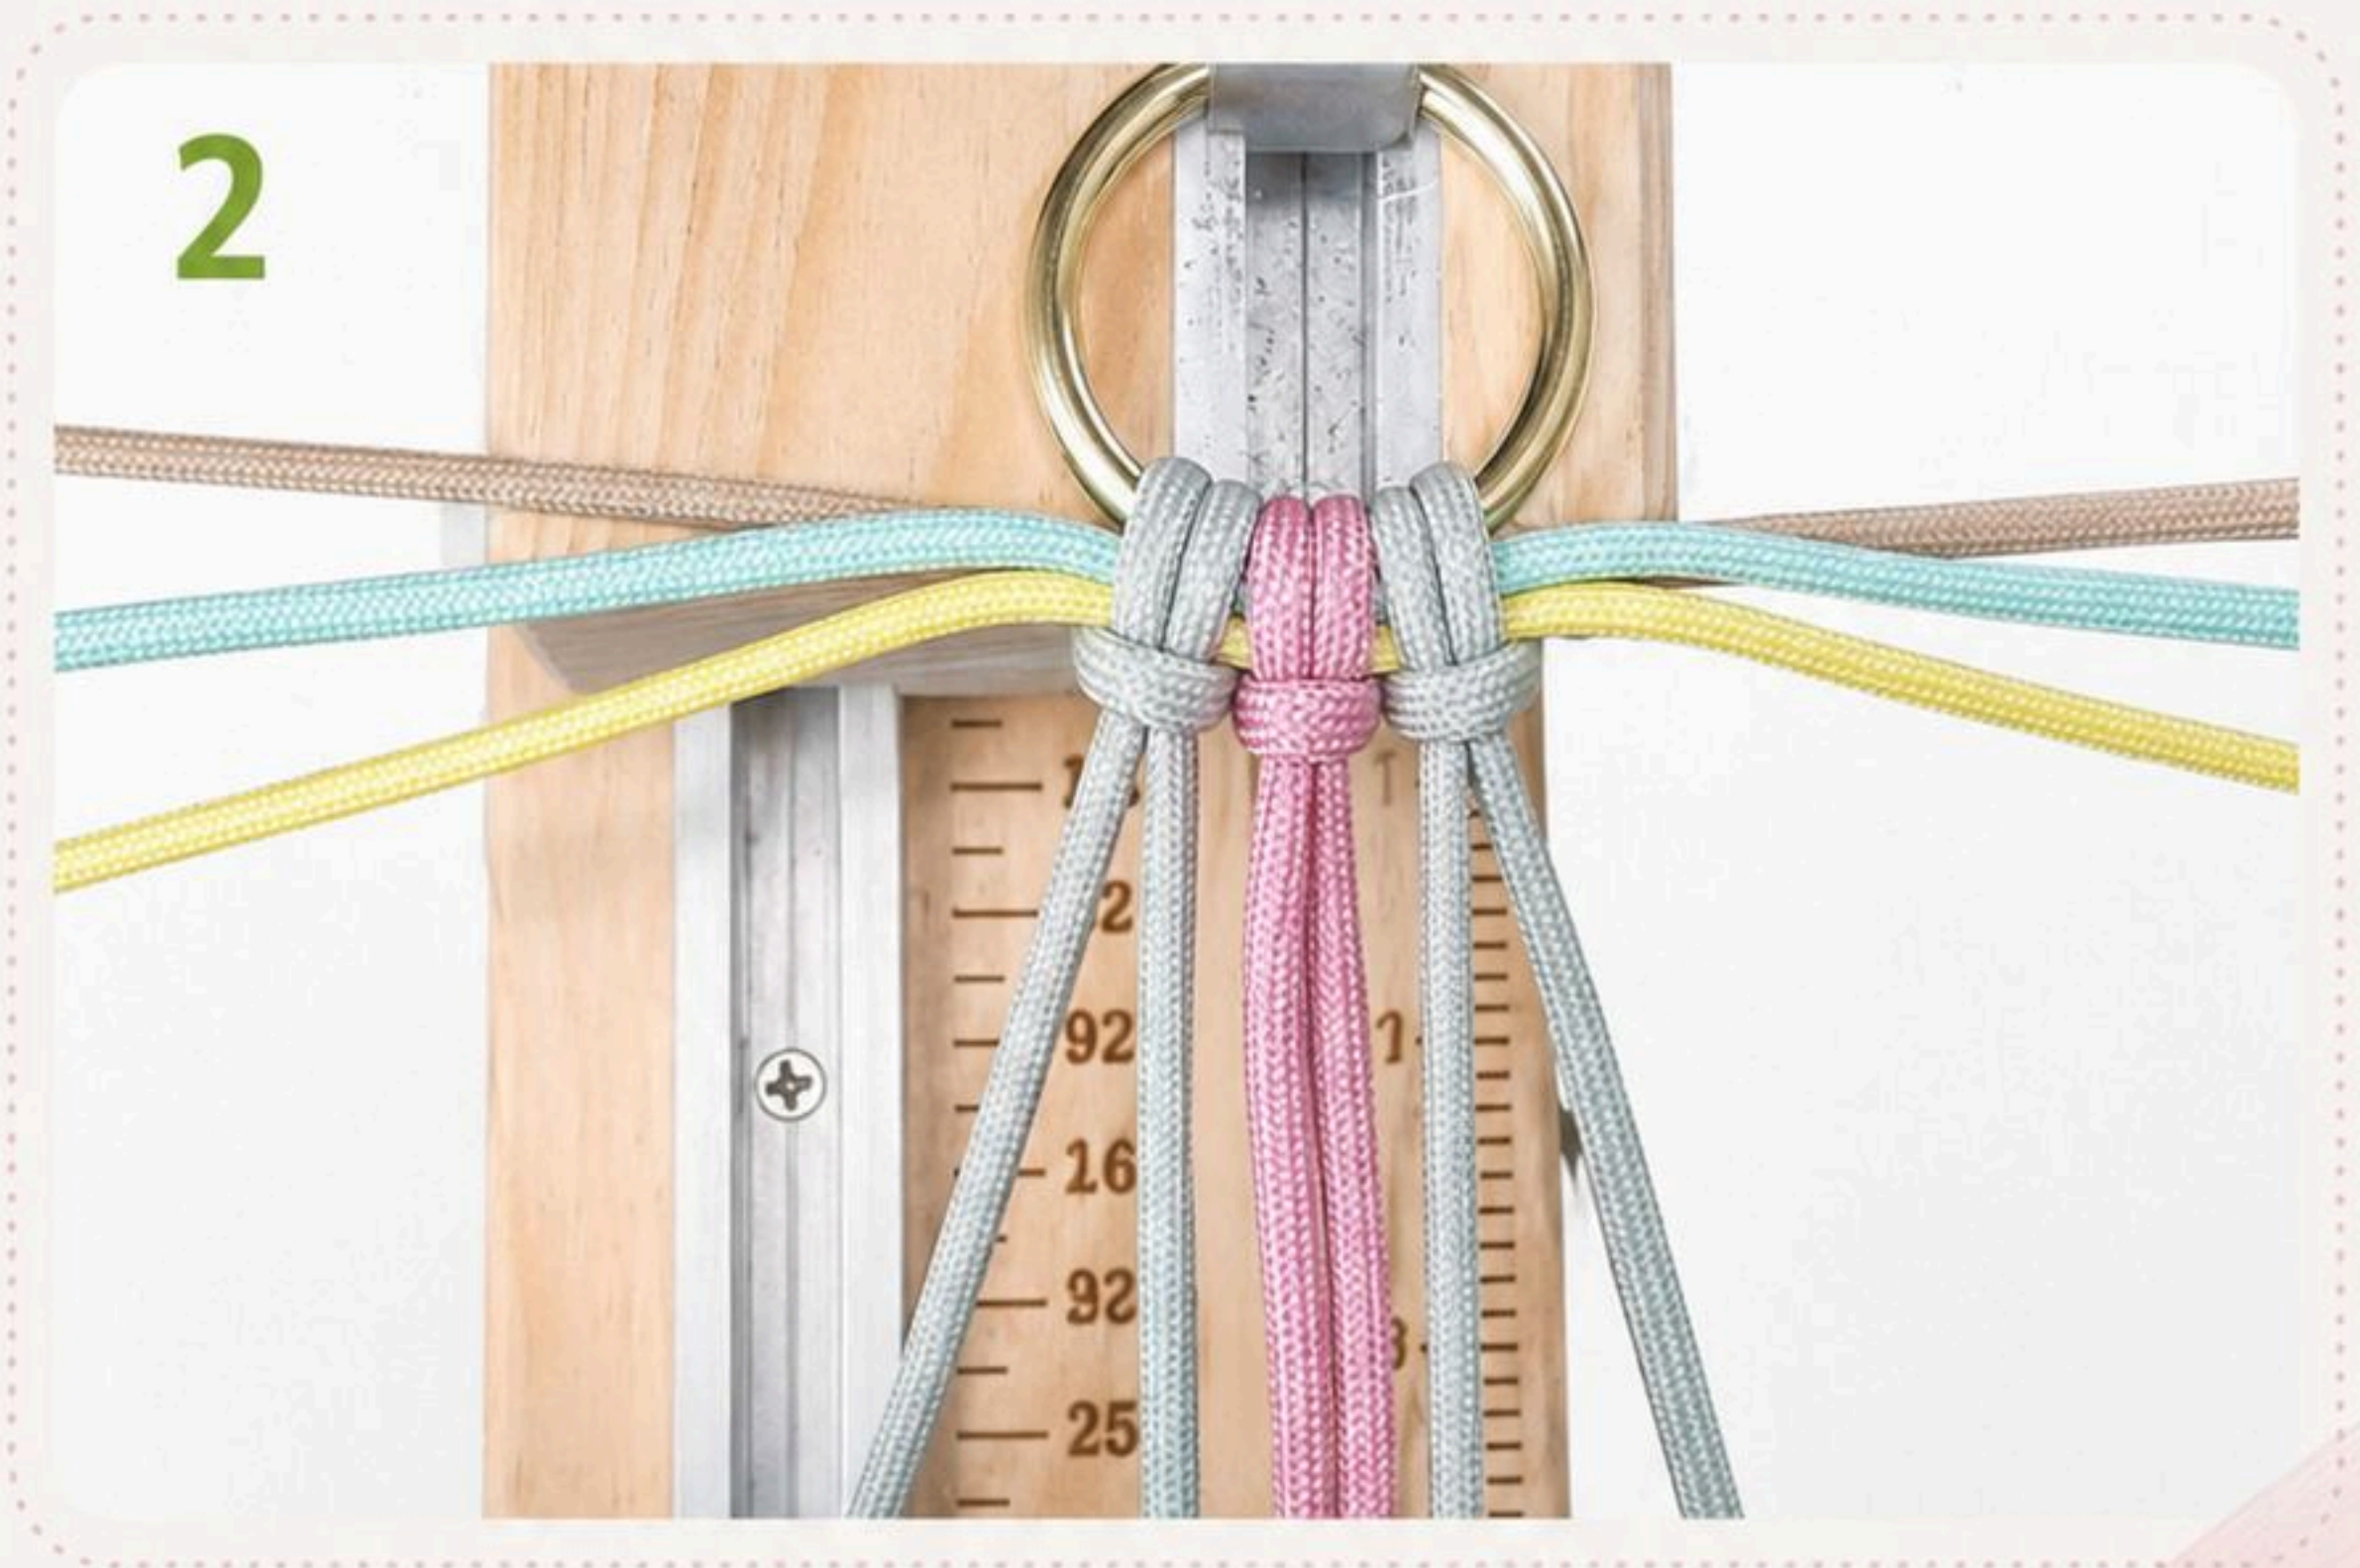

Check that the strands are even on both sides and that the center cords are sitting neatly before you begin knotting.

Step 2

Form the first loop

Bring the working cord across the front to begin shaping the first side of the knot.

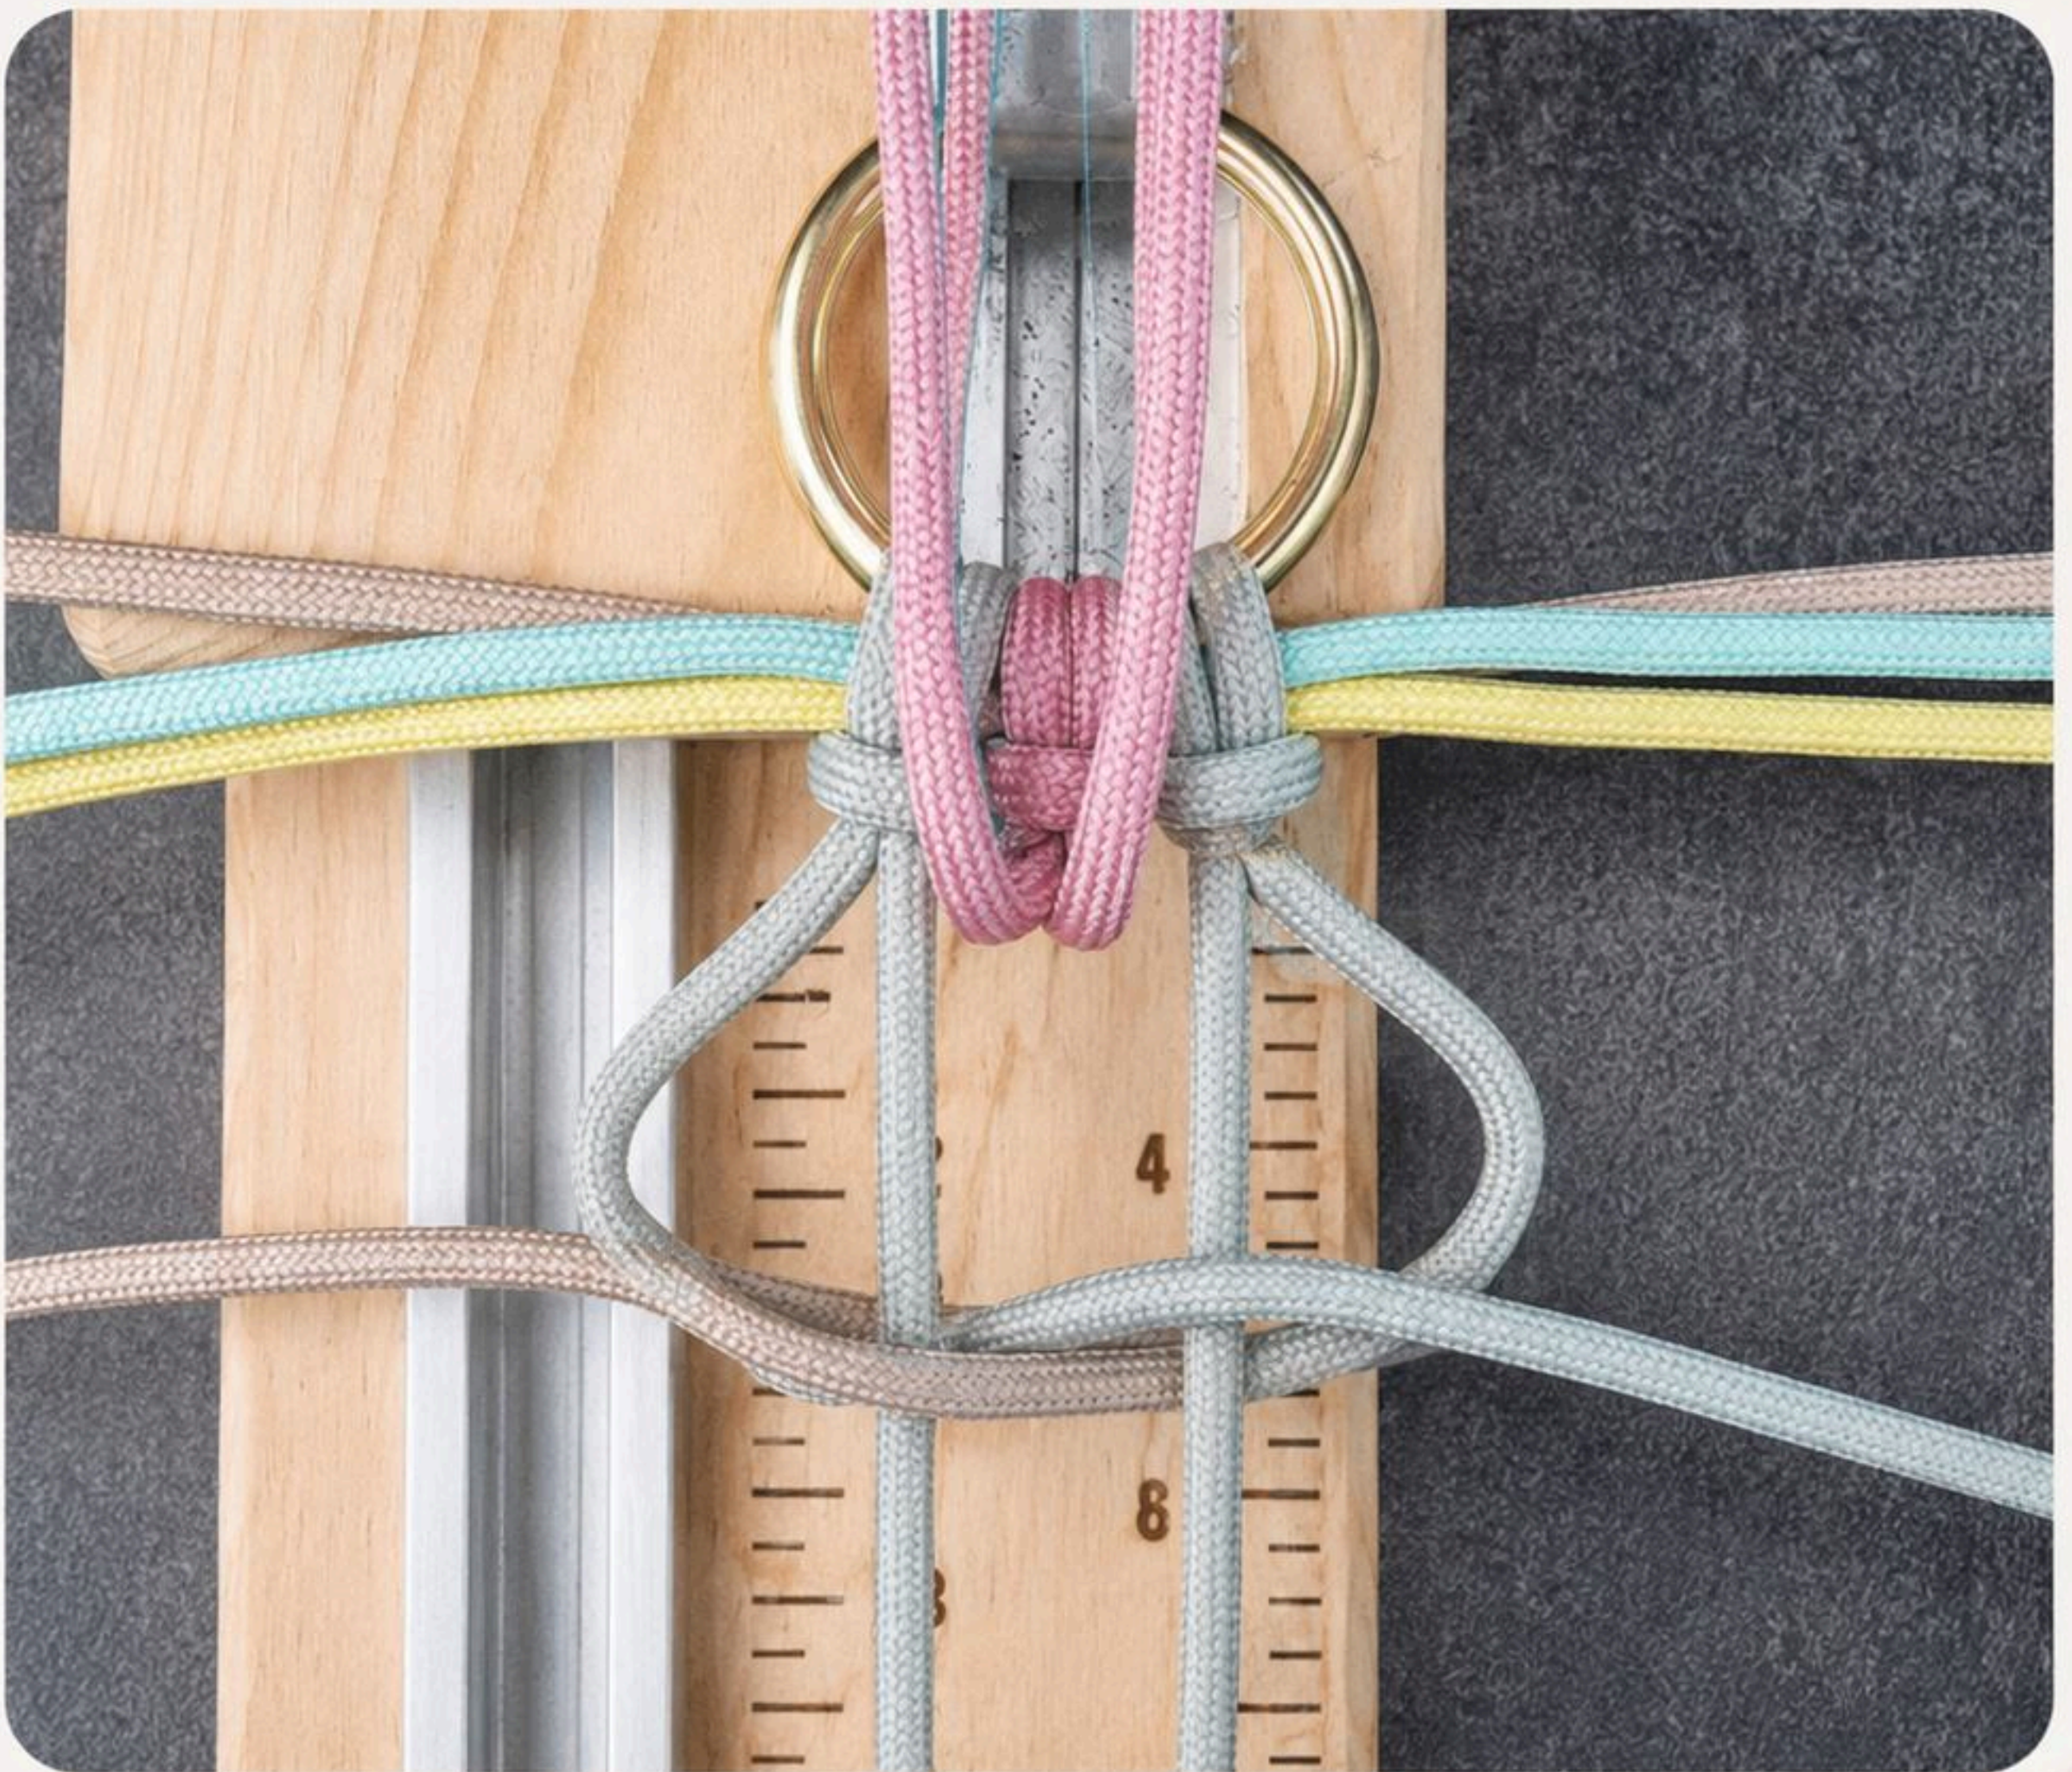

Premium DIY Pattern • Beginner-Friendly Layout

Step 3

Separate and position the strands

Arrange the cords neatly so the next pass can be made cleanly and evenly.

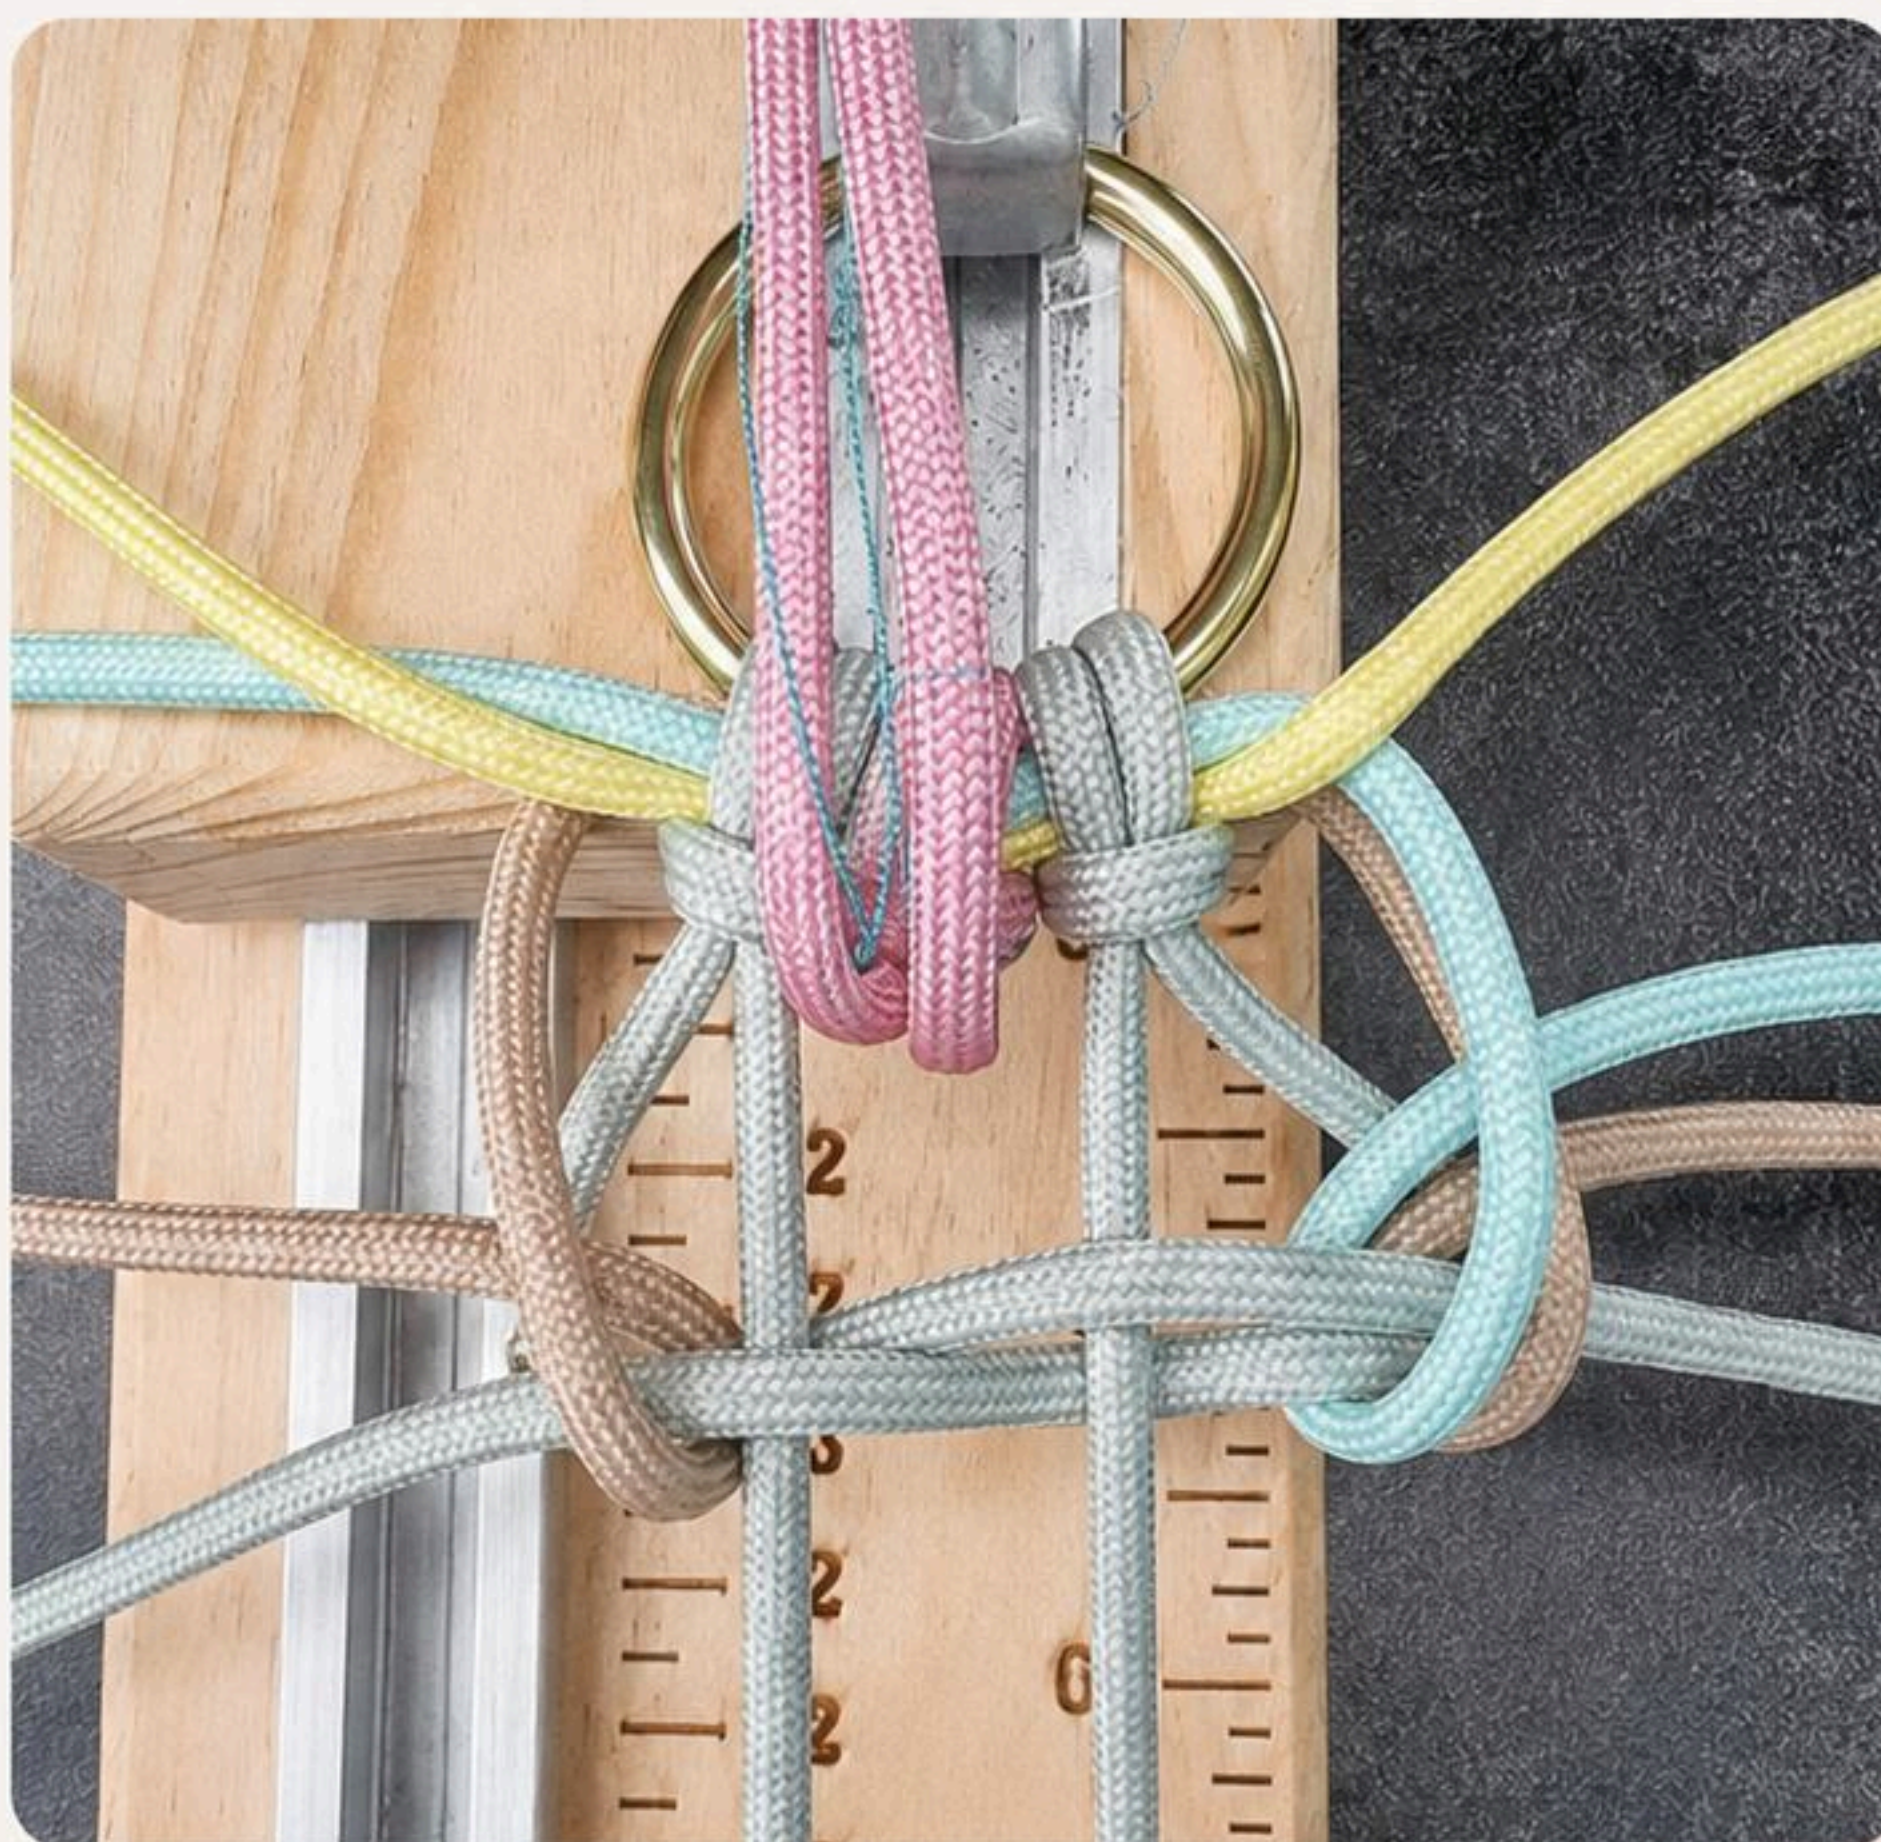

Step 4

Pass the cord through

Guide the strand through the formed opening
and keep the shape open and visible.

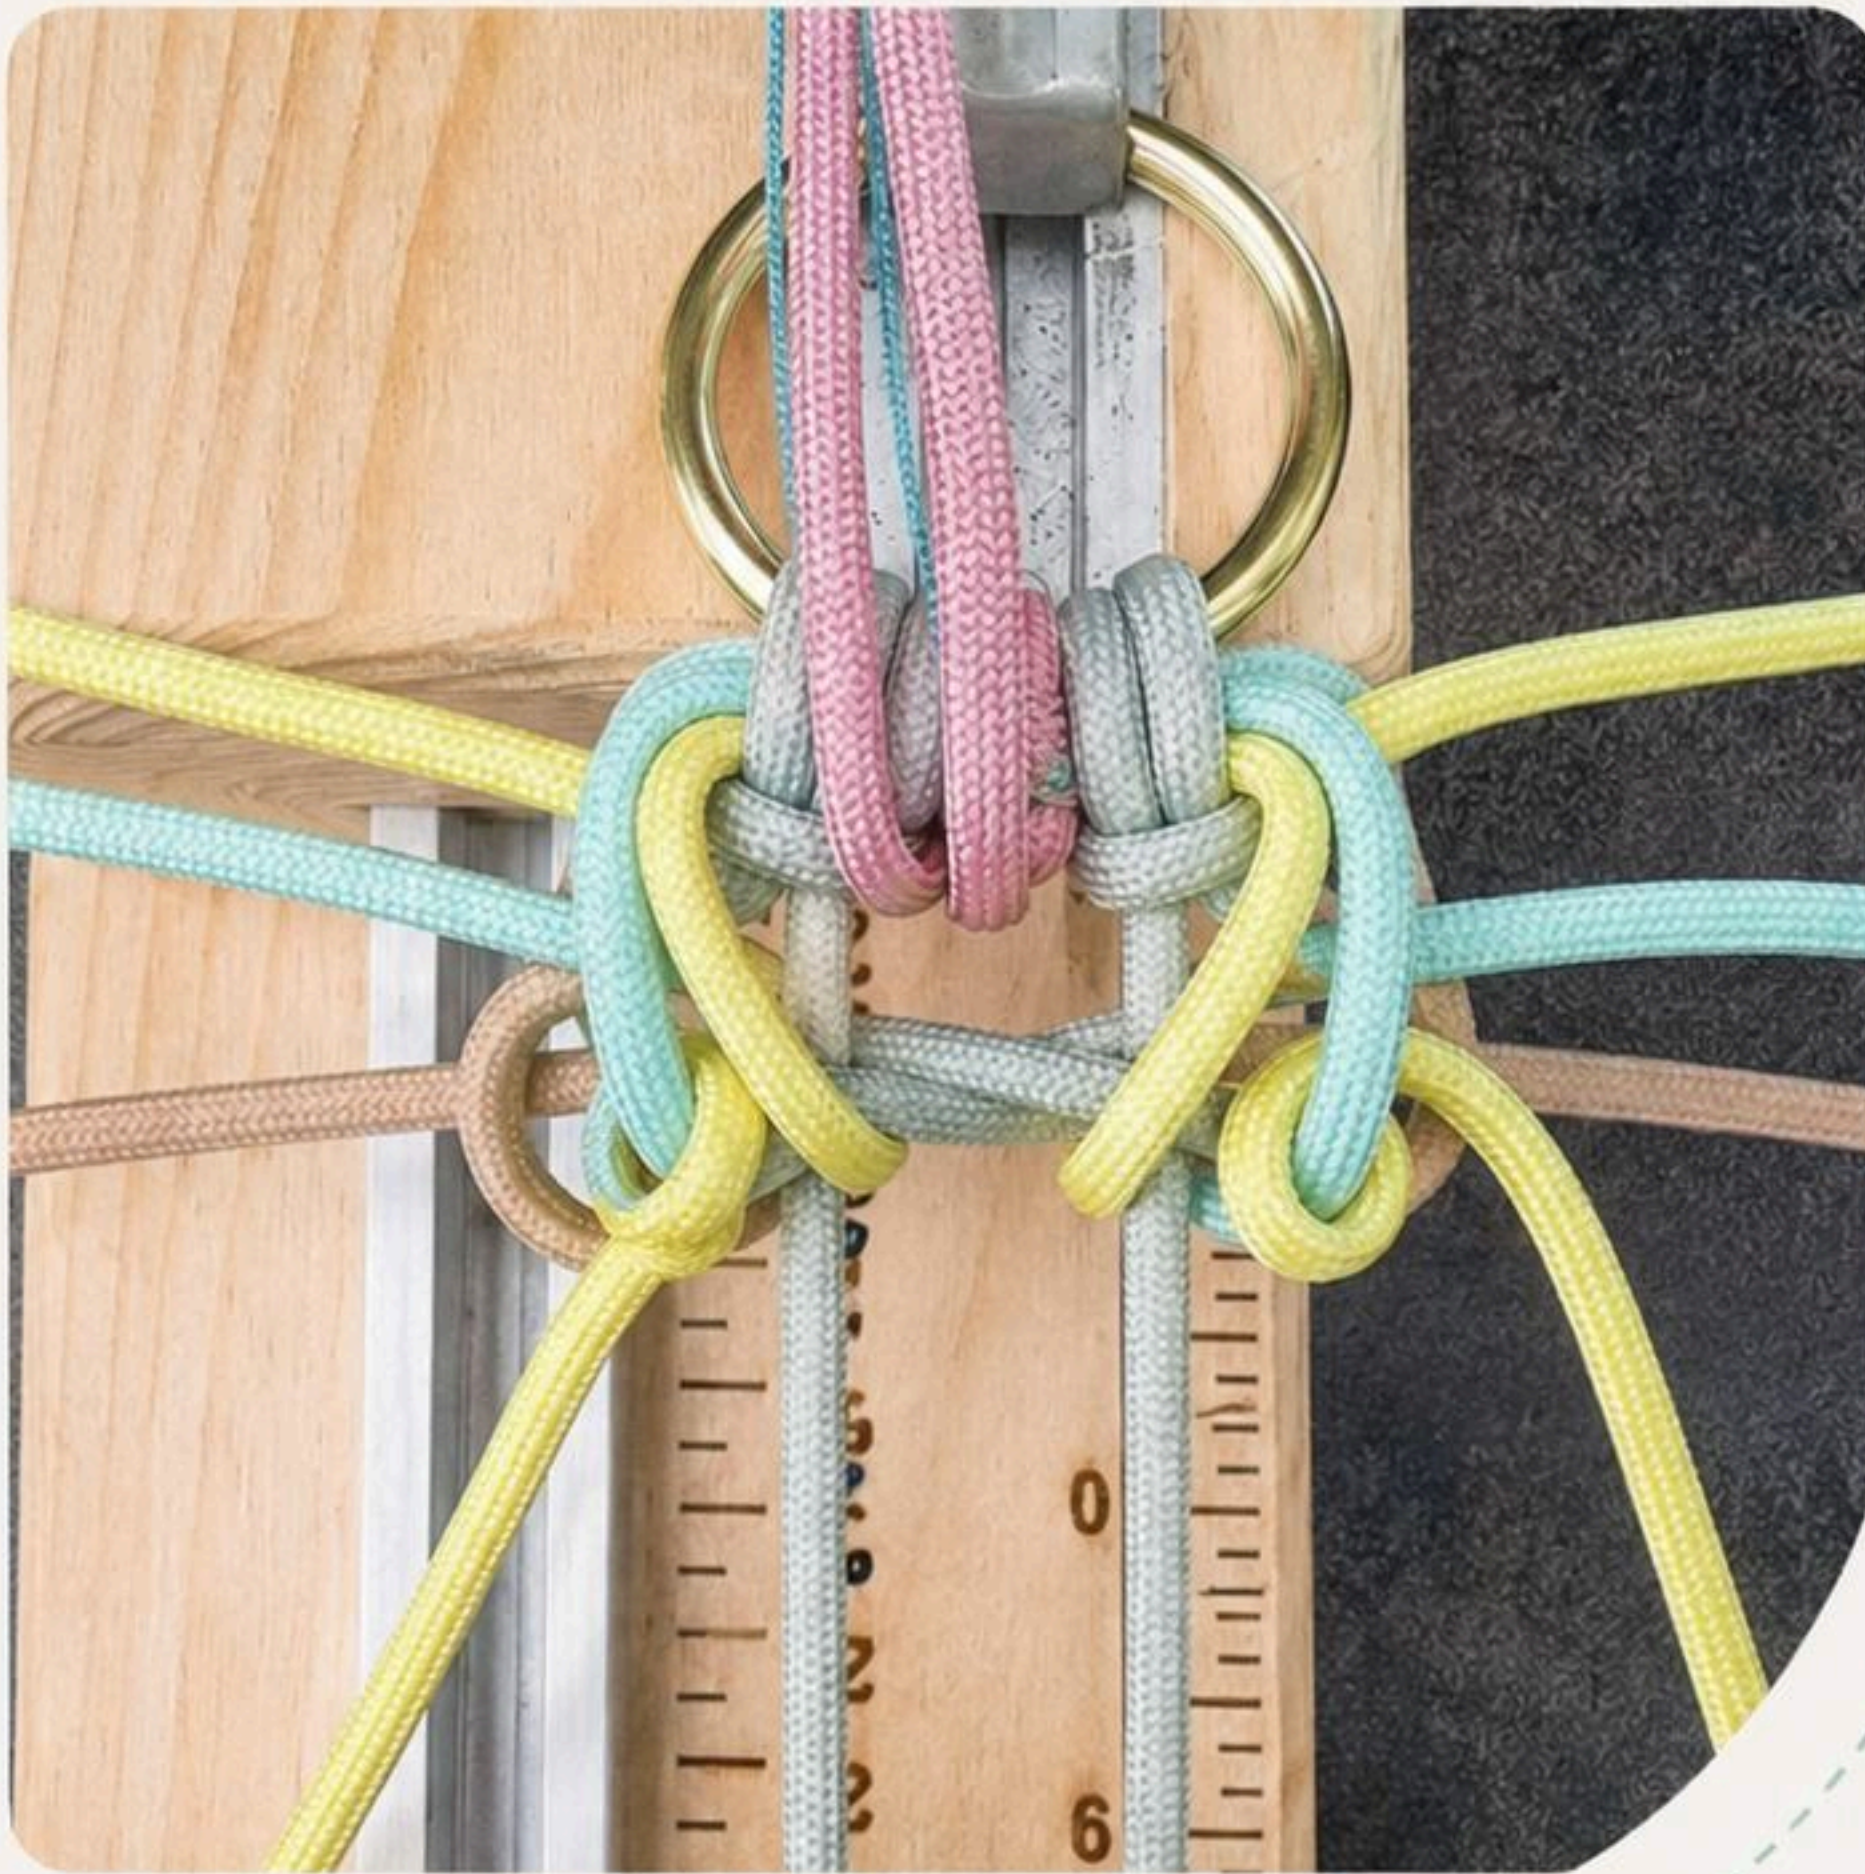

Premium DIY Pattern • Beginner-Friendly Layout

Step 5

Tighten the first section

Pull gradually and evenly so the knot settles into a balanced shape.

Fire Dragon Paracord Pet Collar

Step 6

Cross the working strands

Lay the next working cords across the center bundle to continue building the pattern.

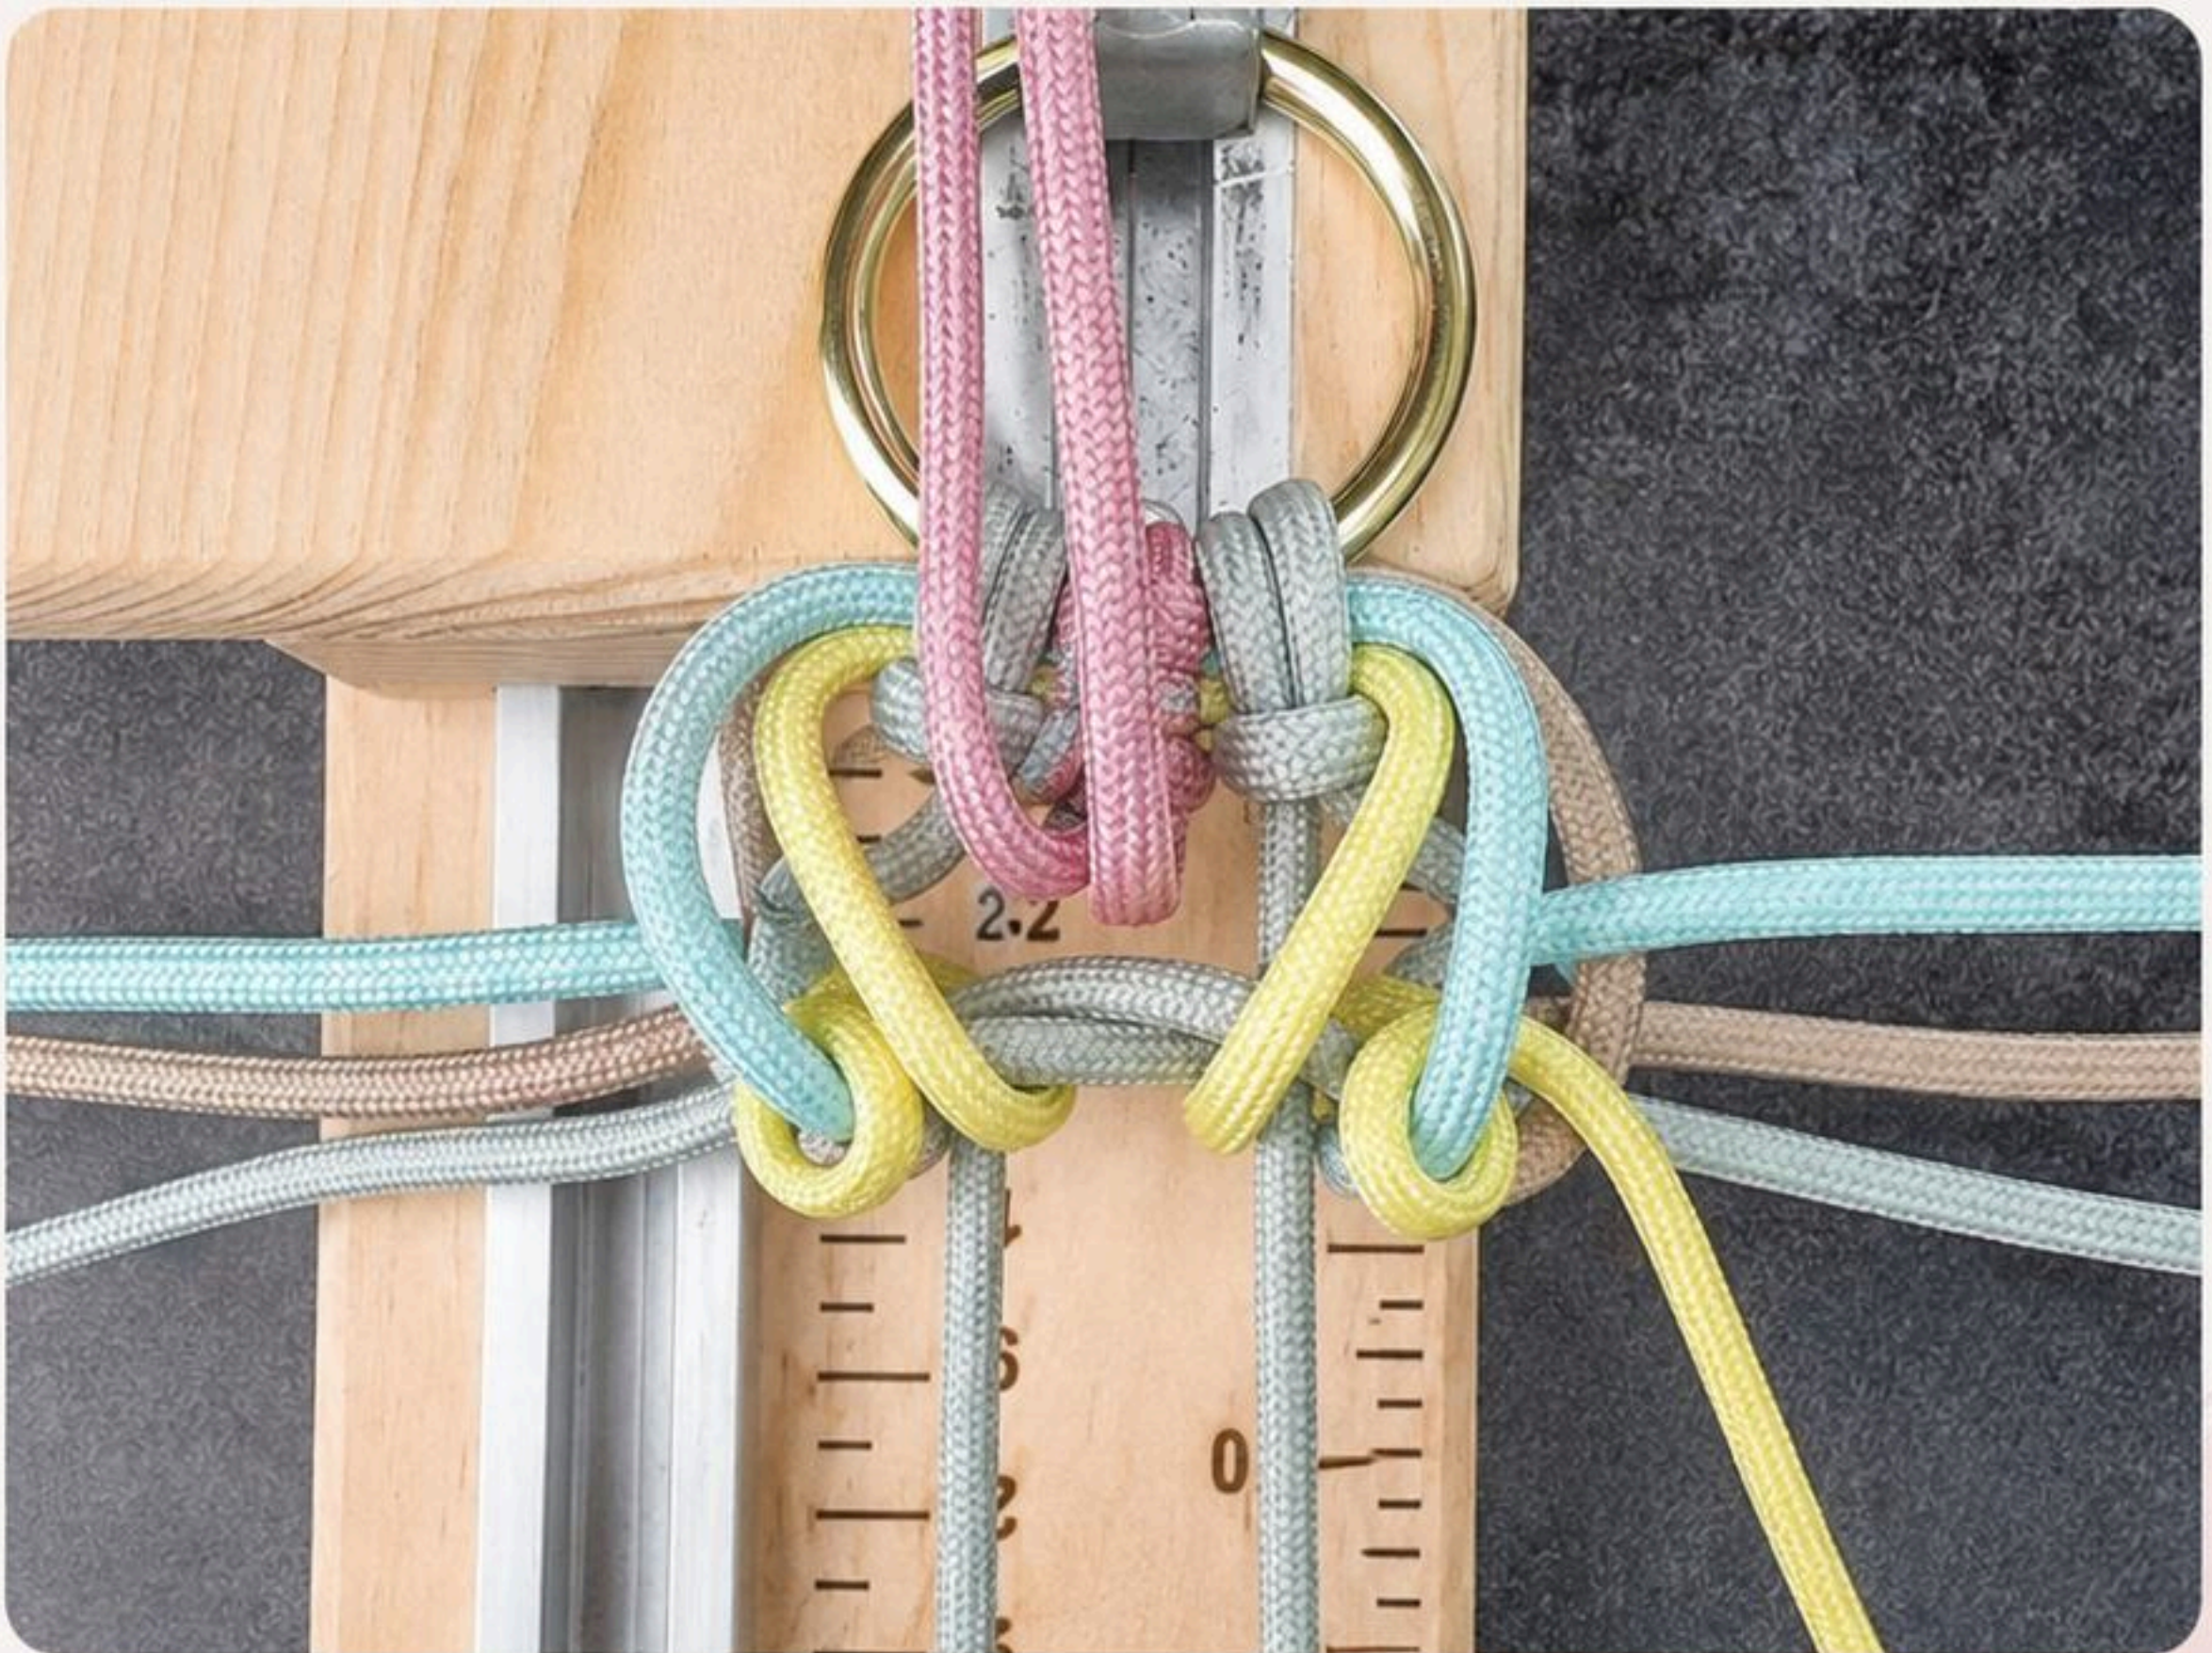

Step 7

Build the side detail

Guide the strand into place and keep the side loops even as the pattern begins to form.

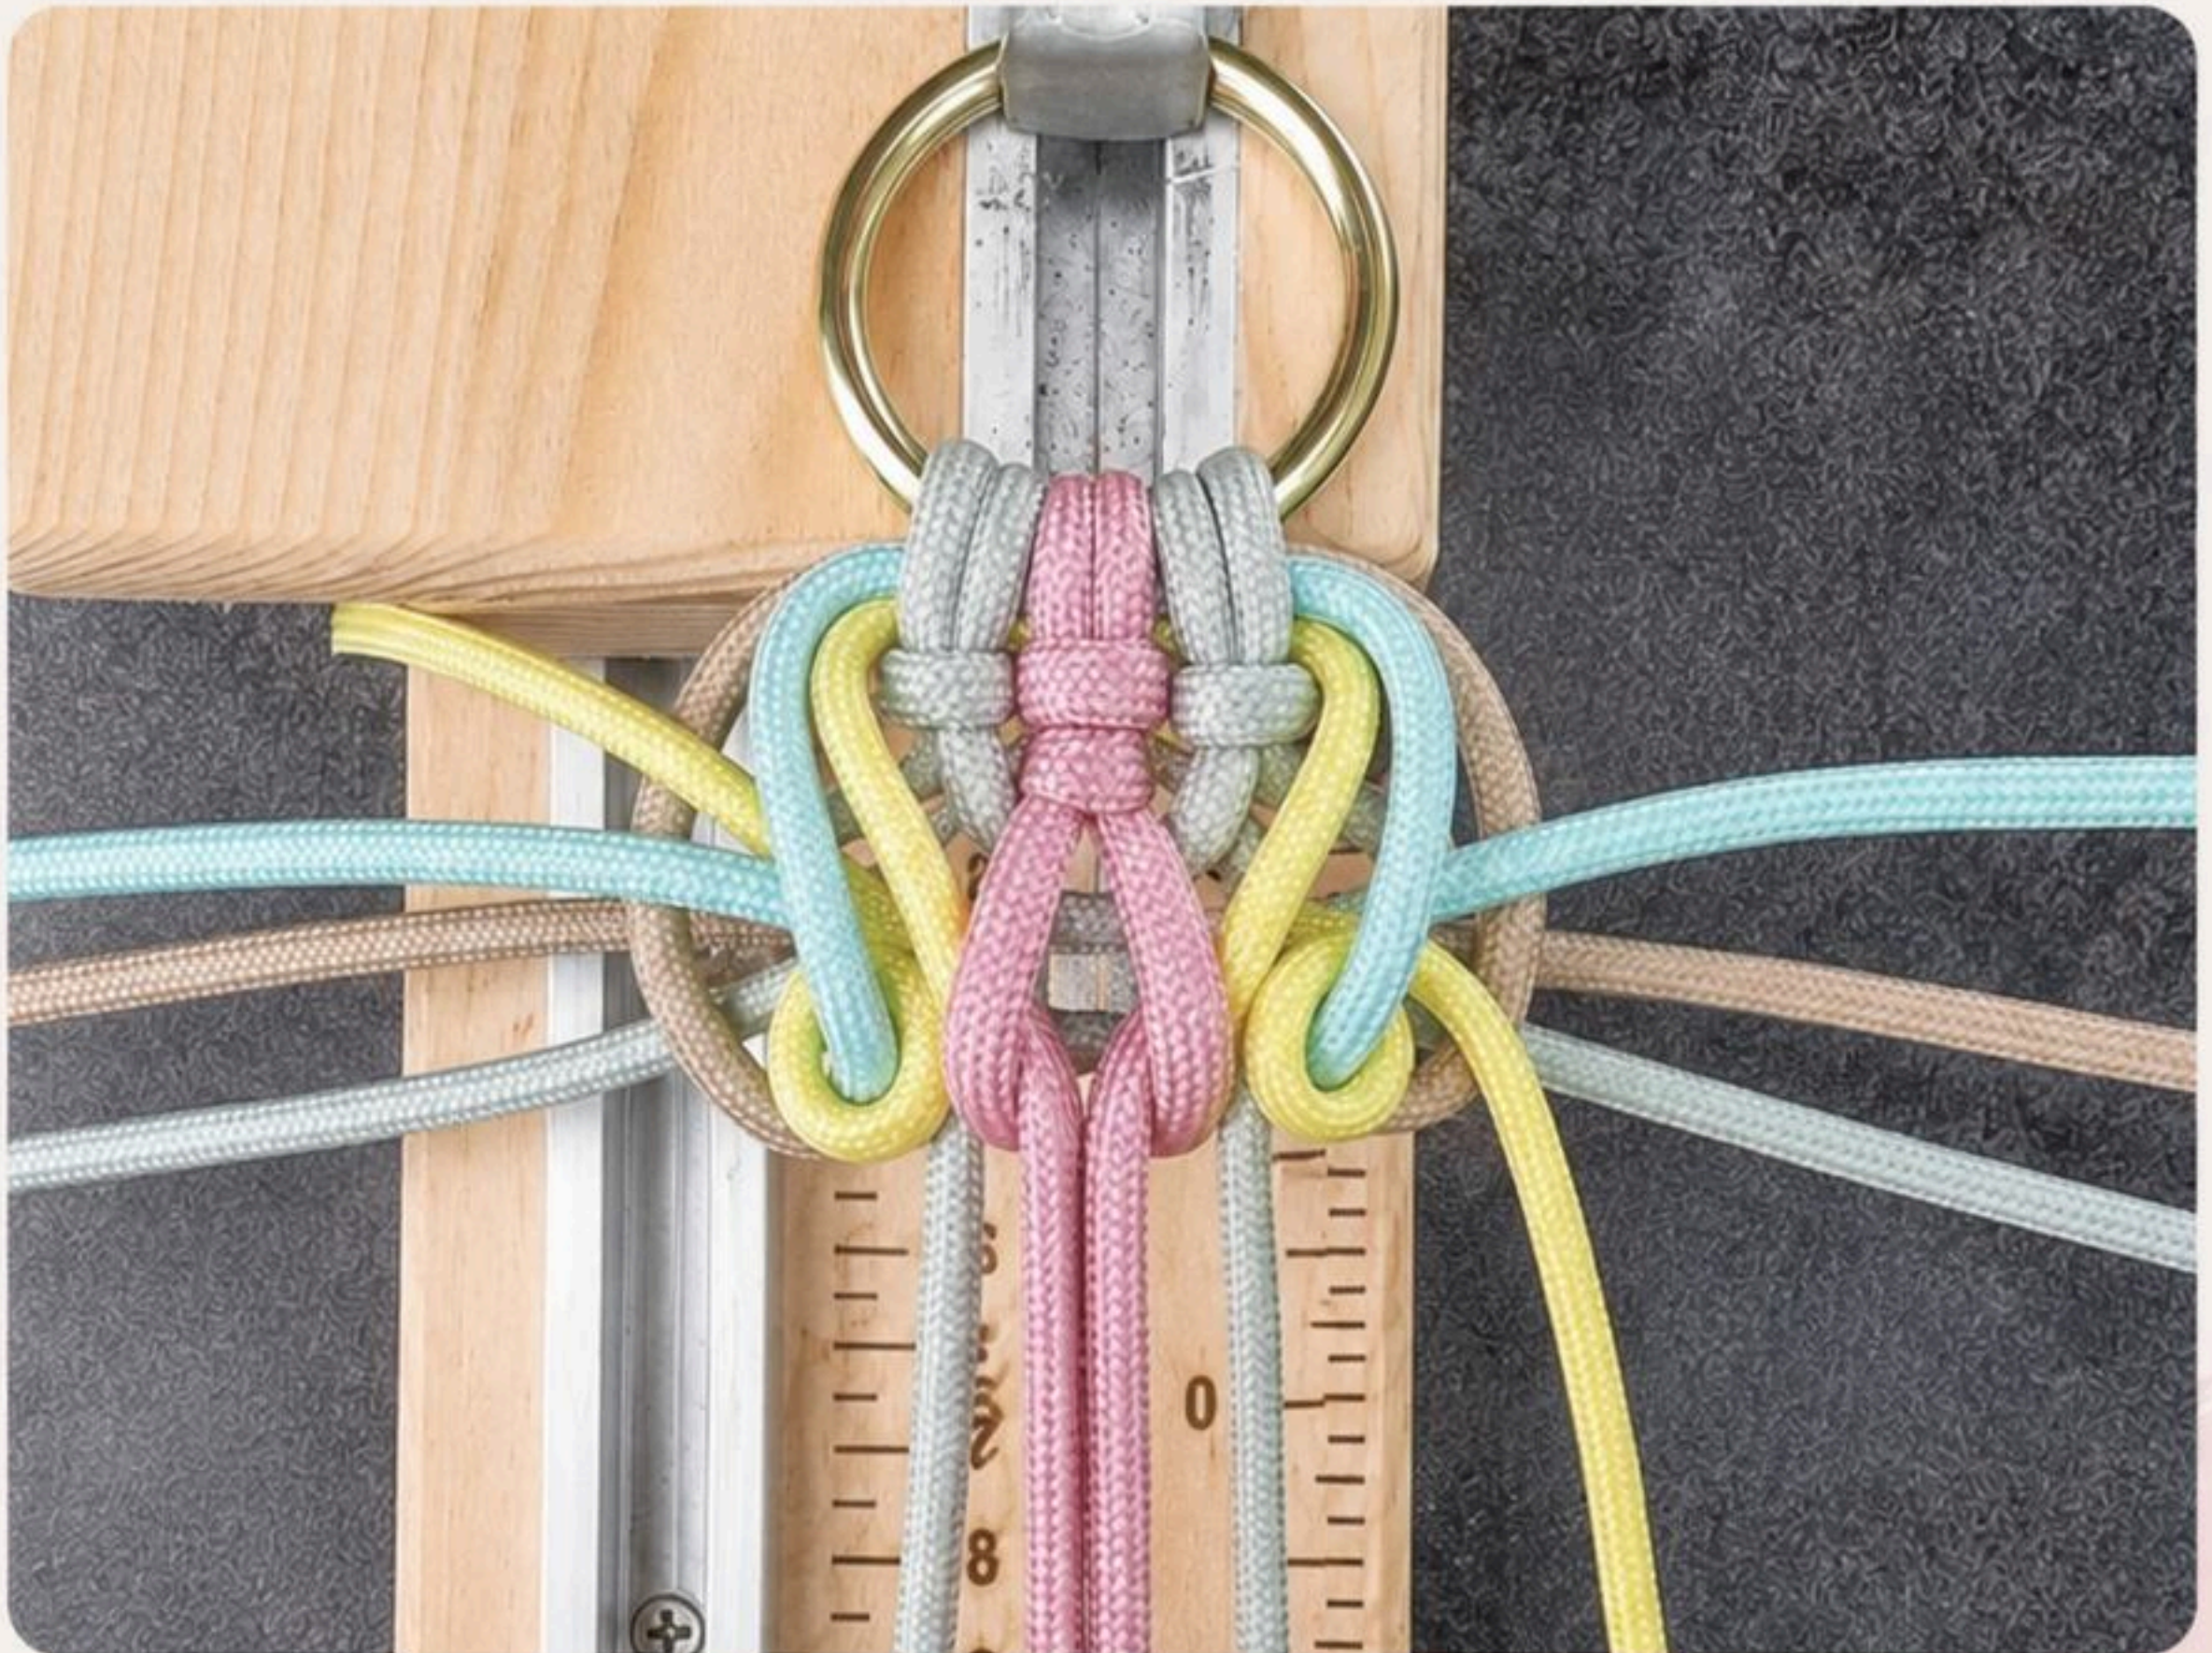

Step 8

Refine the side knot

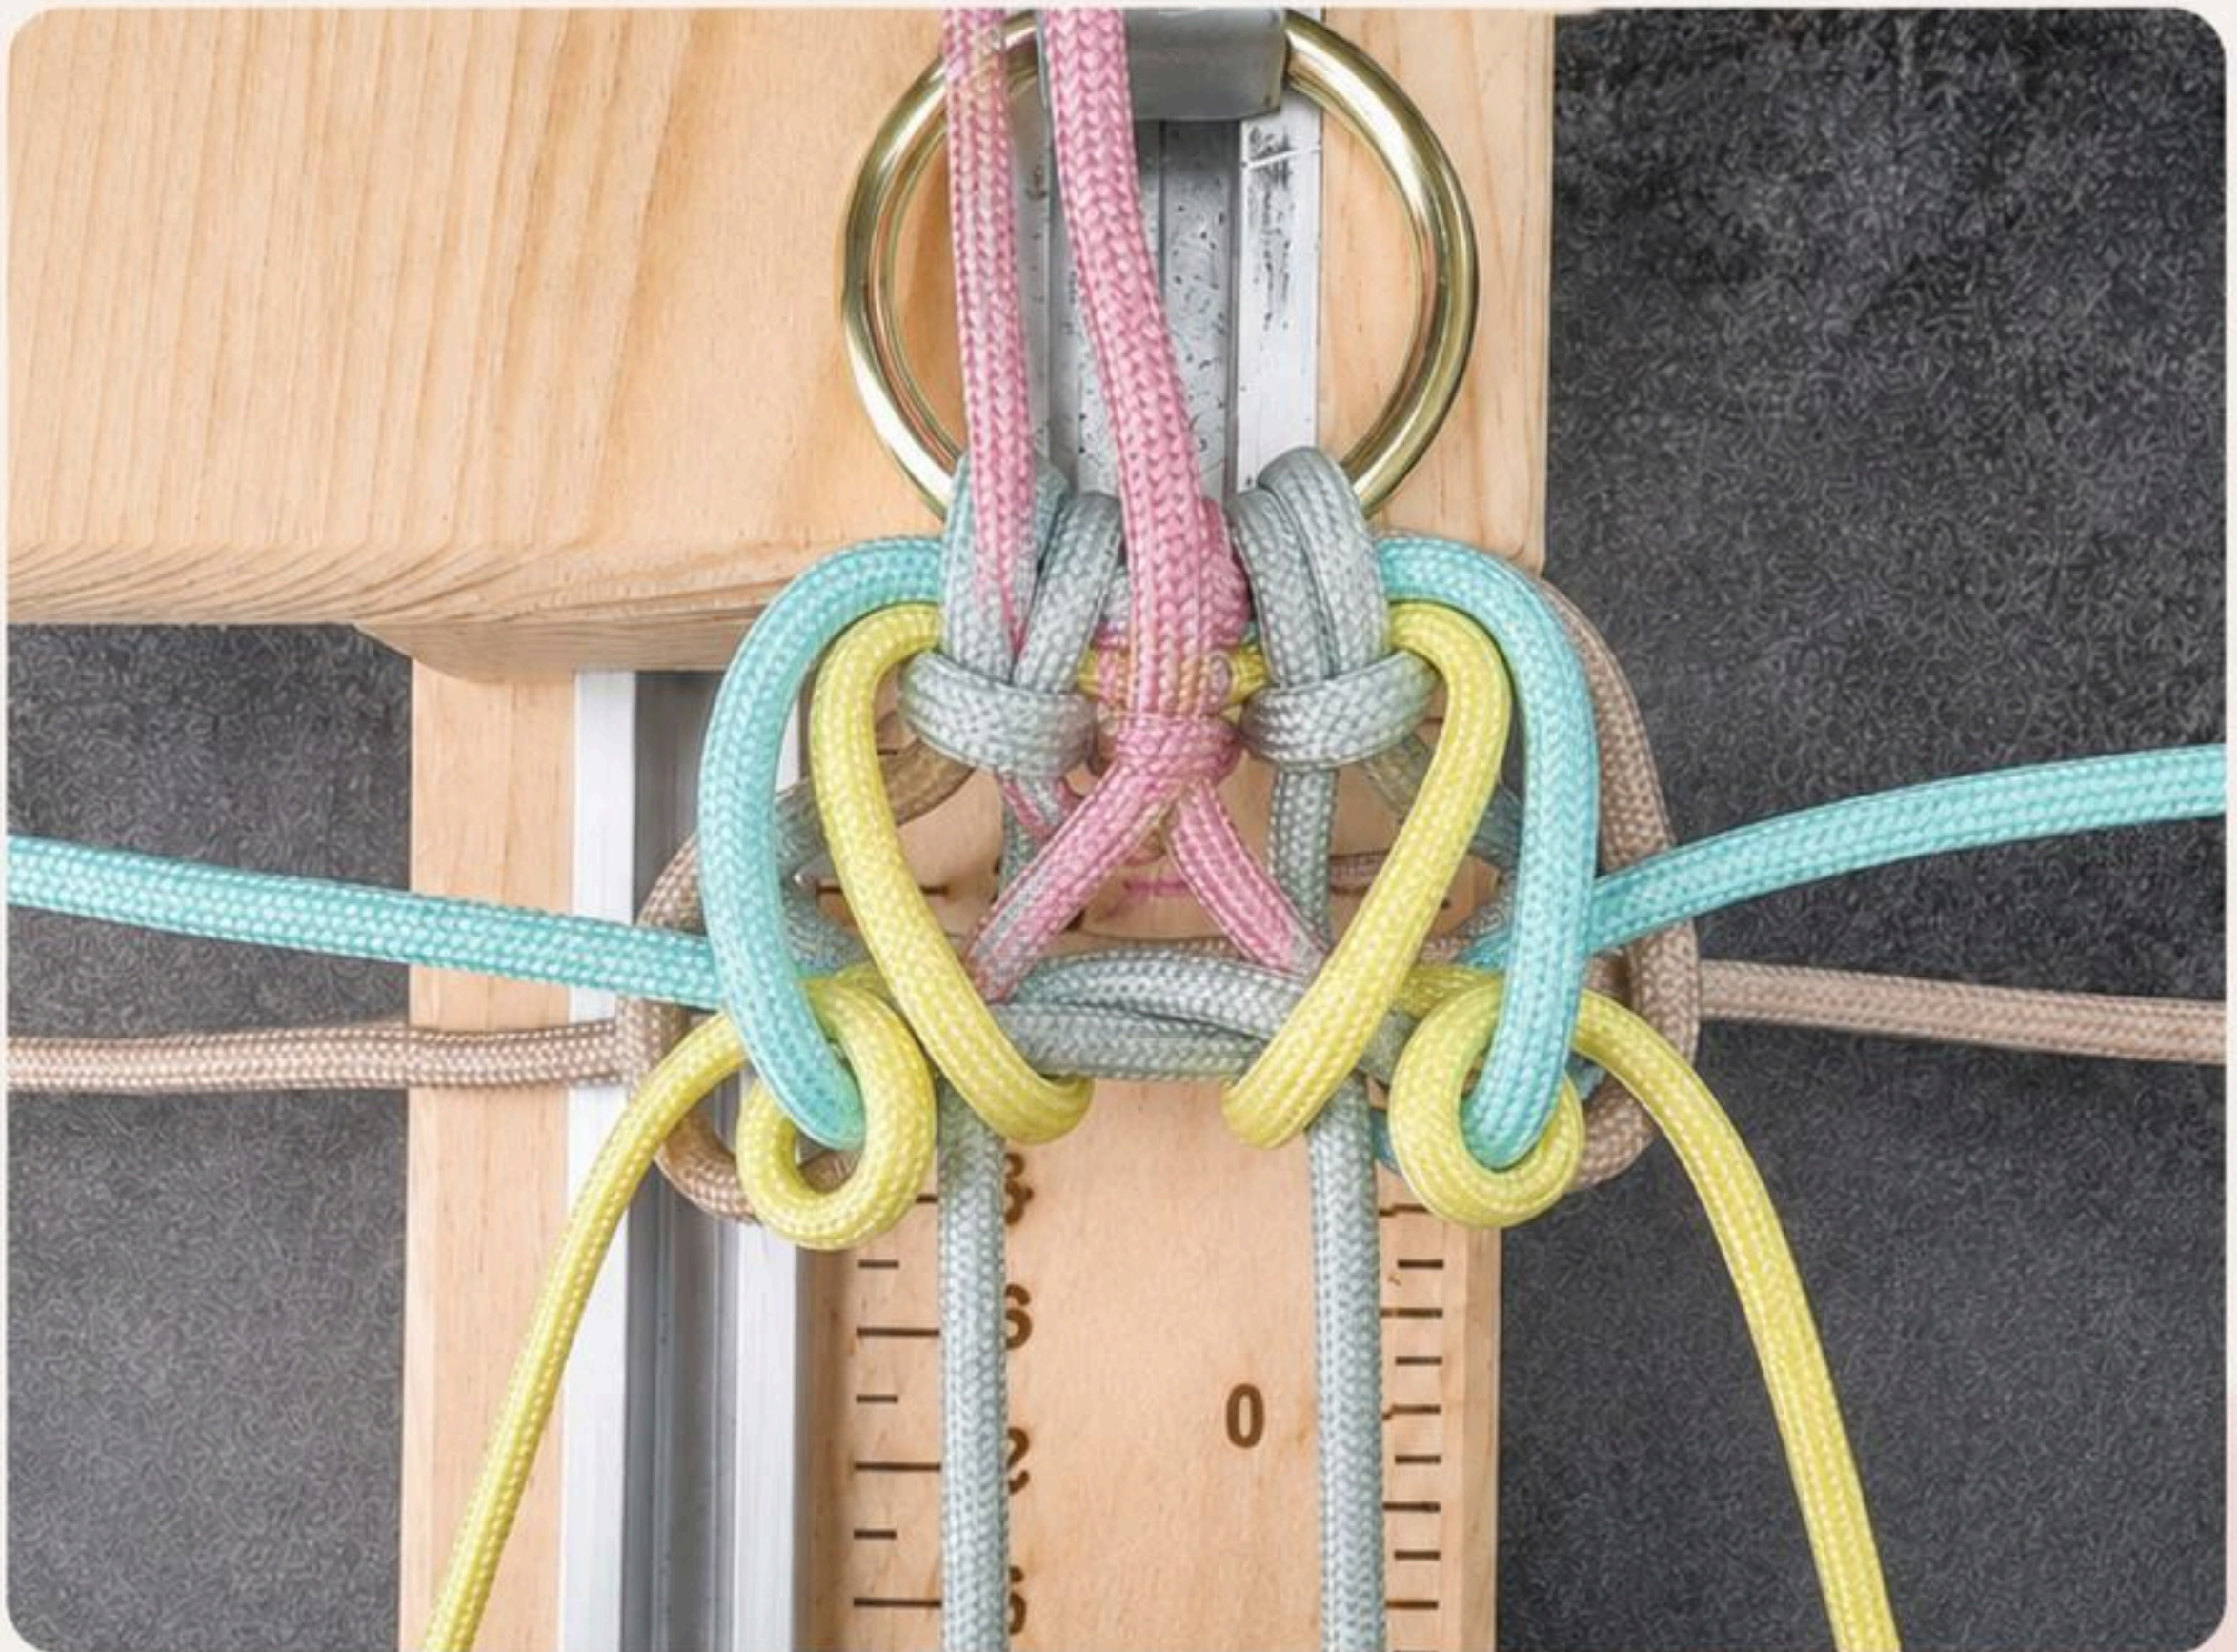

Adjust the loops and tighten the side knots on both sides.
Make sure the cords lie flat and even.

Step 9

Set the next loop

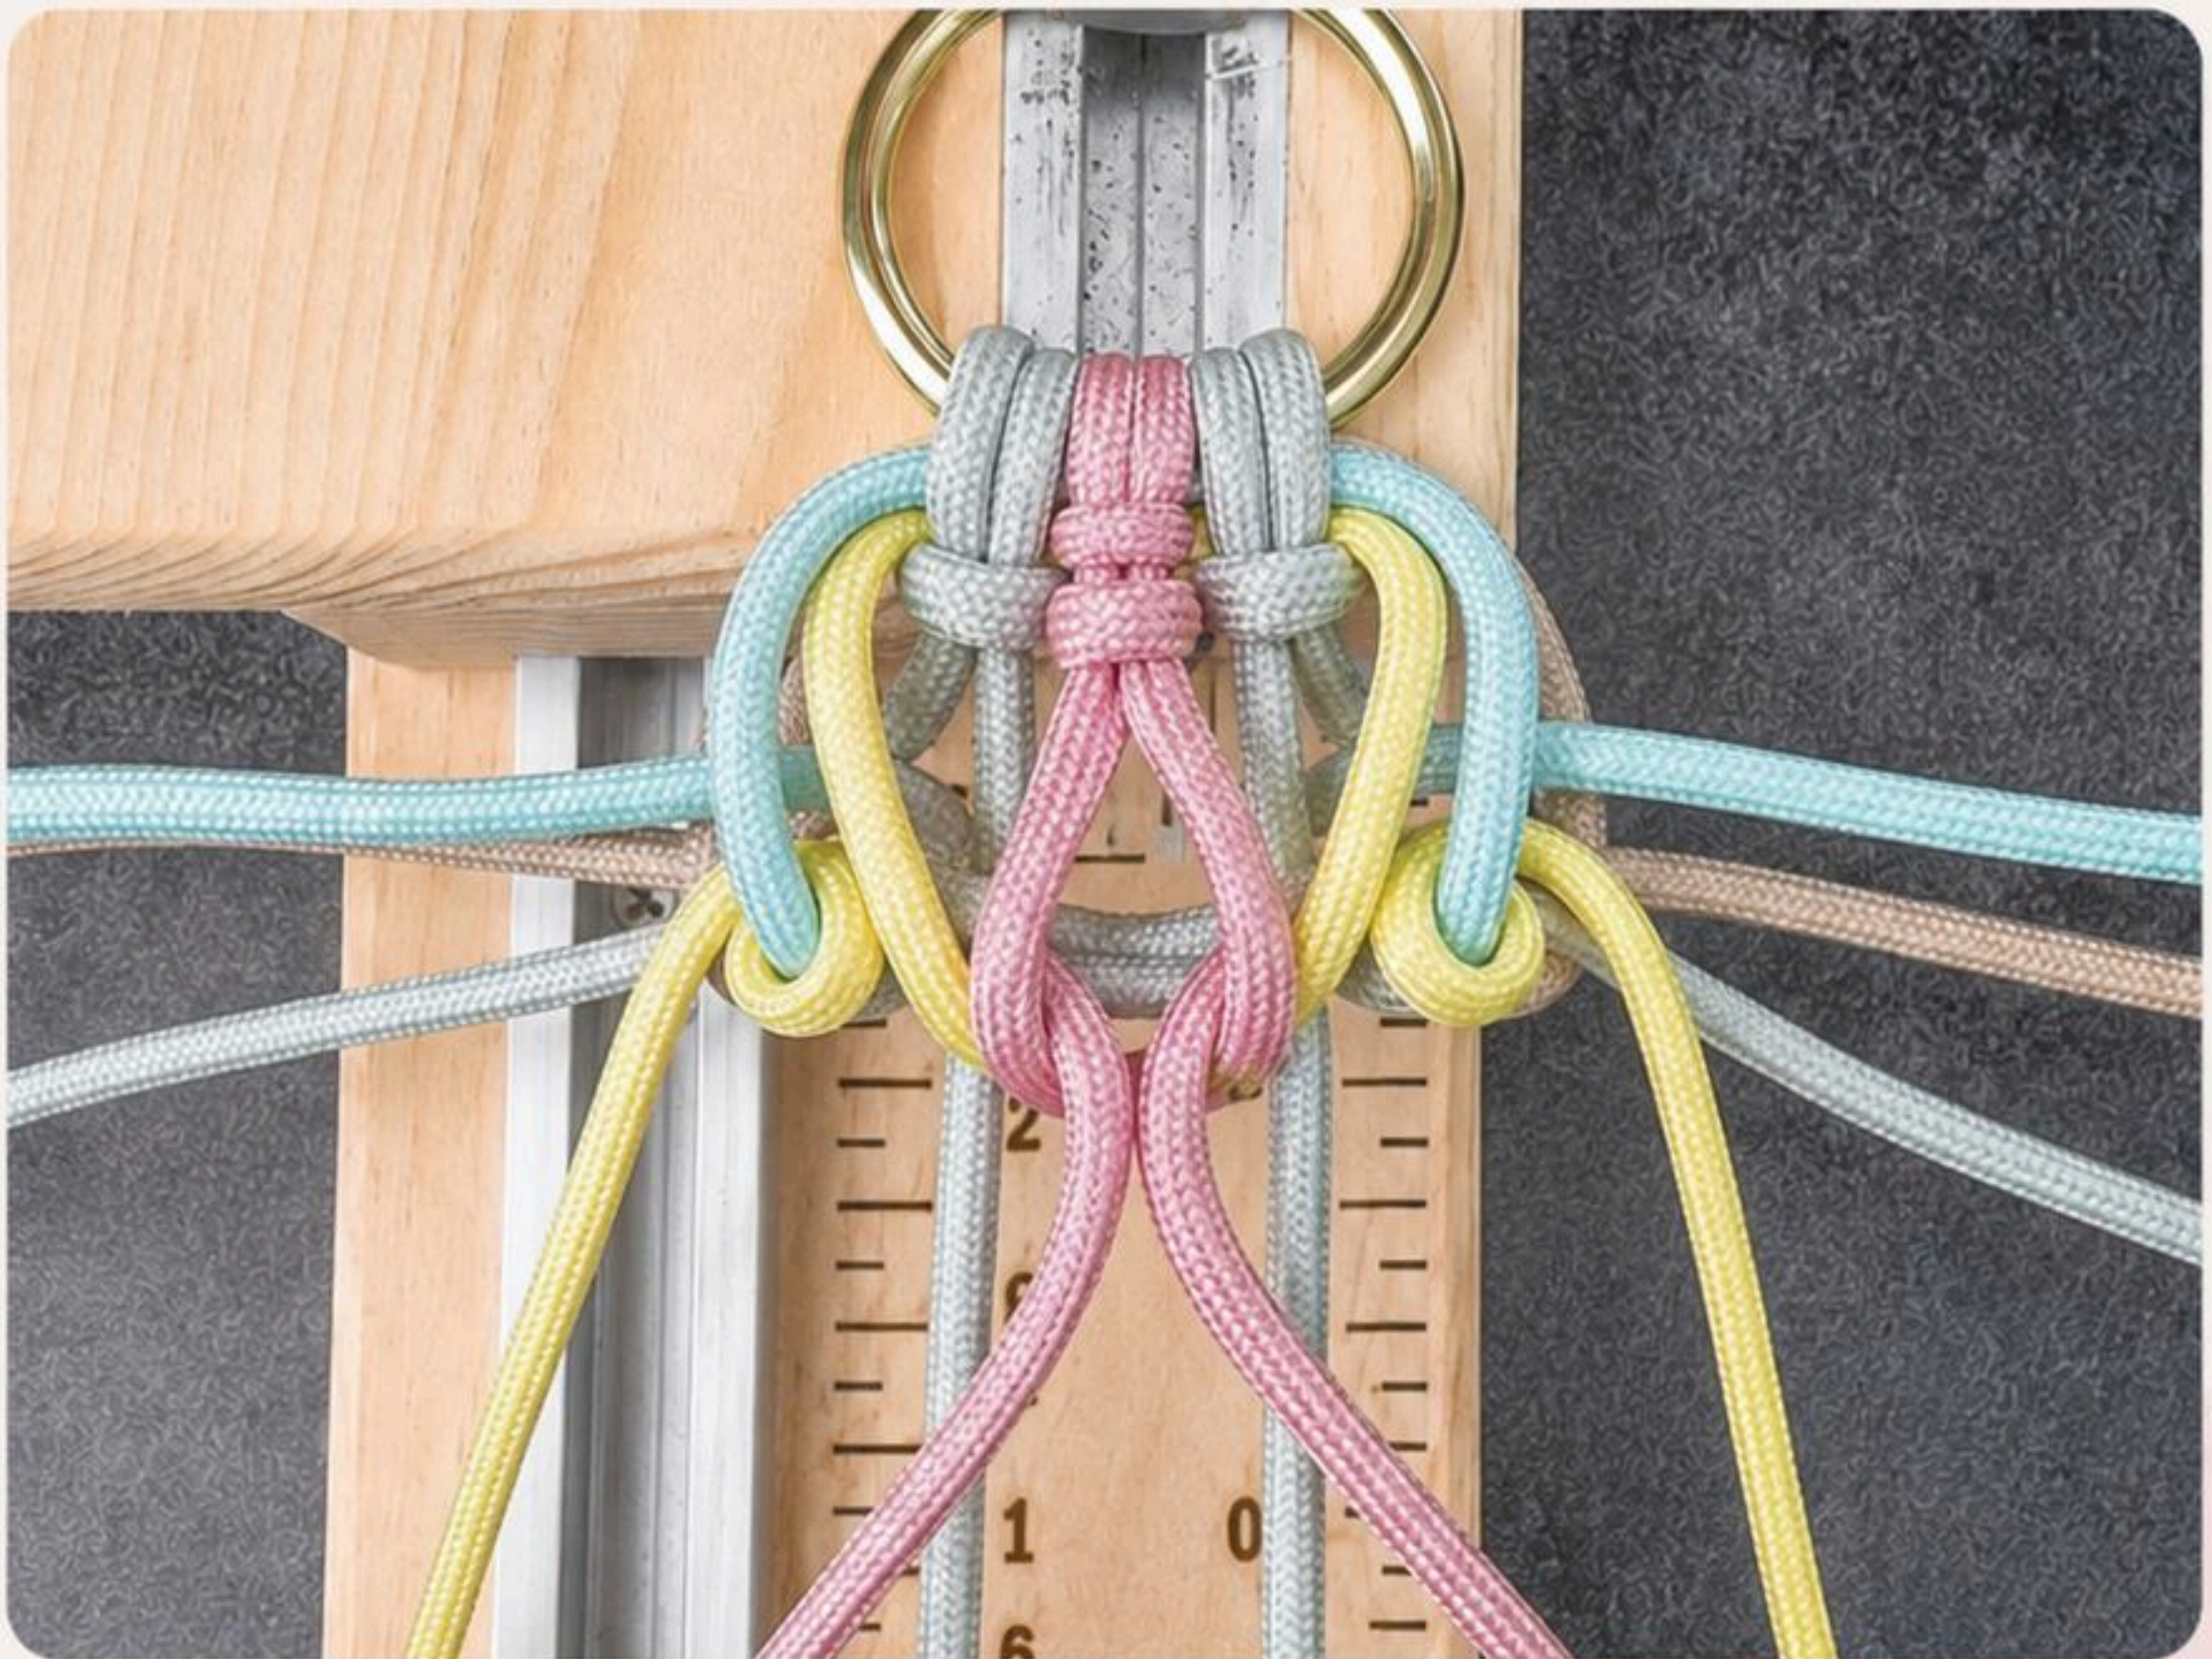

Bring the working ends forward and cross the outer cords. This sets up the next loop and keeps the pattern symmetrical.

Step 10

Cross the center strands

Cross the two center strands over each other.
This creates the base for the next set of knots.

Step 11

Bring the strand through

Take the pink strand (center-left) and bring it through the opening created in the row below. Pull it all the way through and keep it snug.

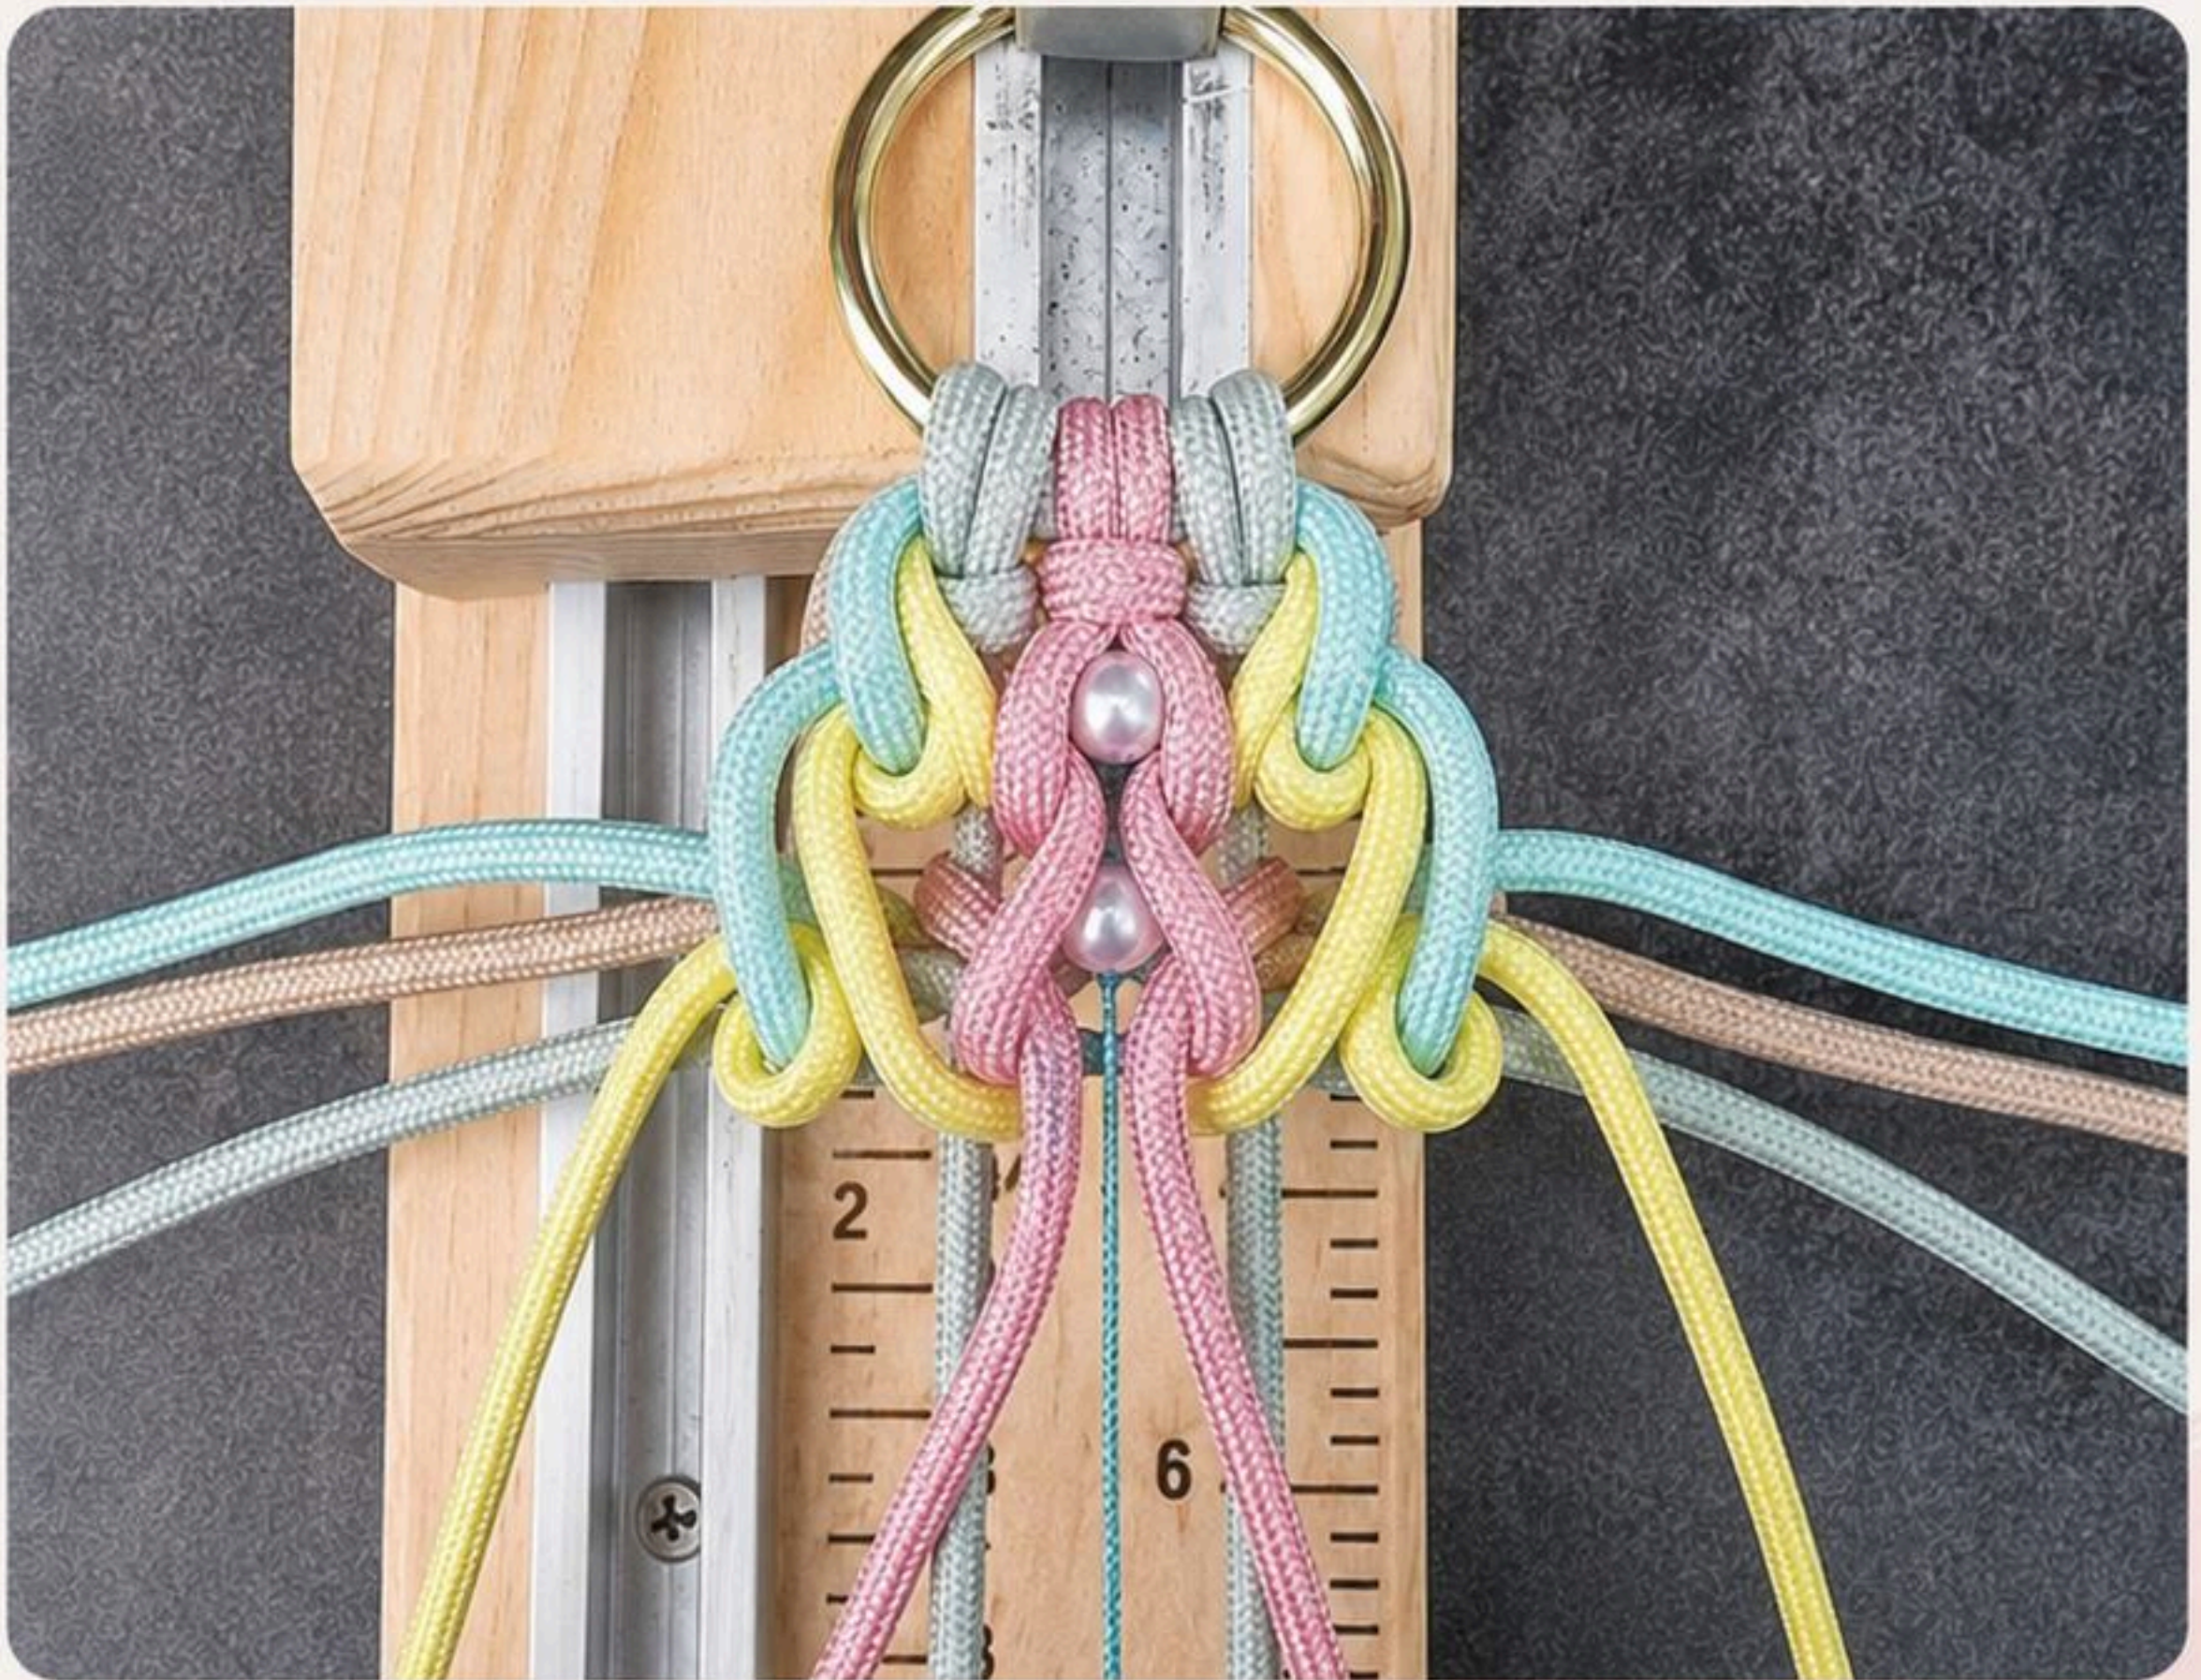

Step 12

Tighten evenly

Gently pull each working cord to snug the knots.
Keep the tension even so the pattern stays balanced.

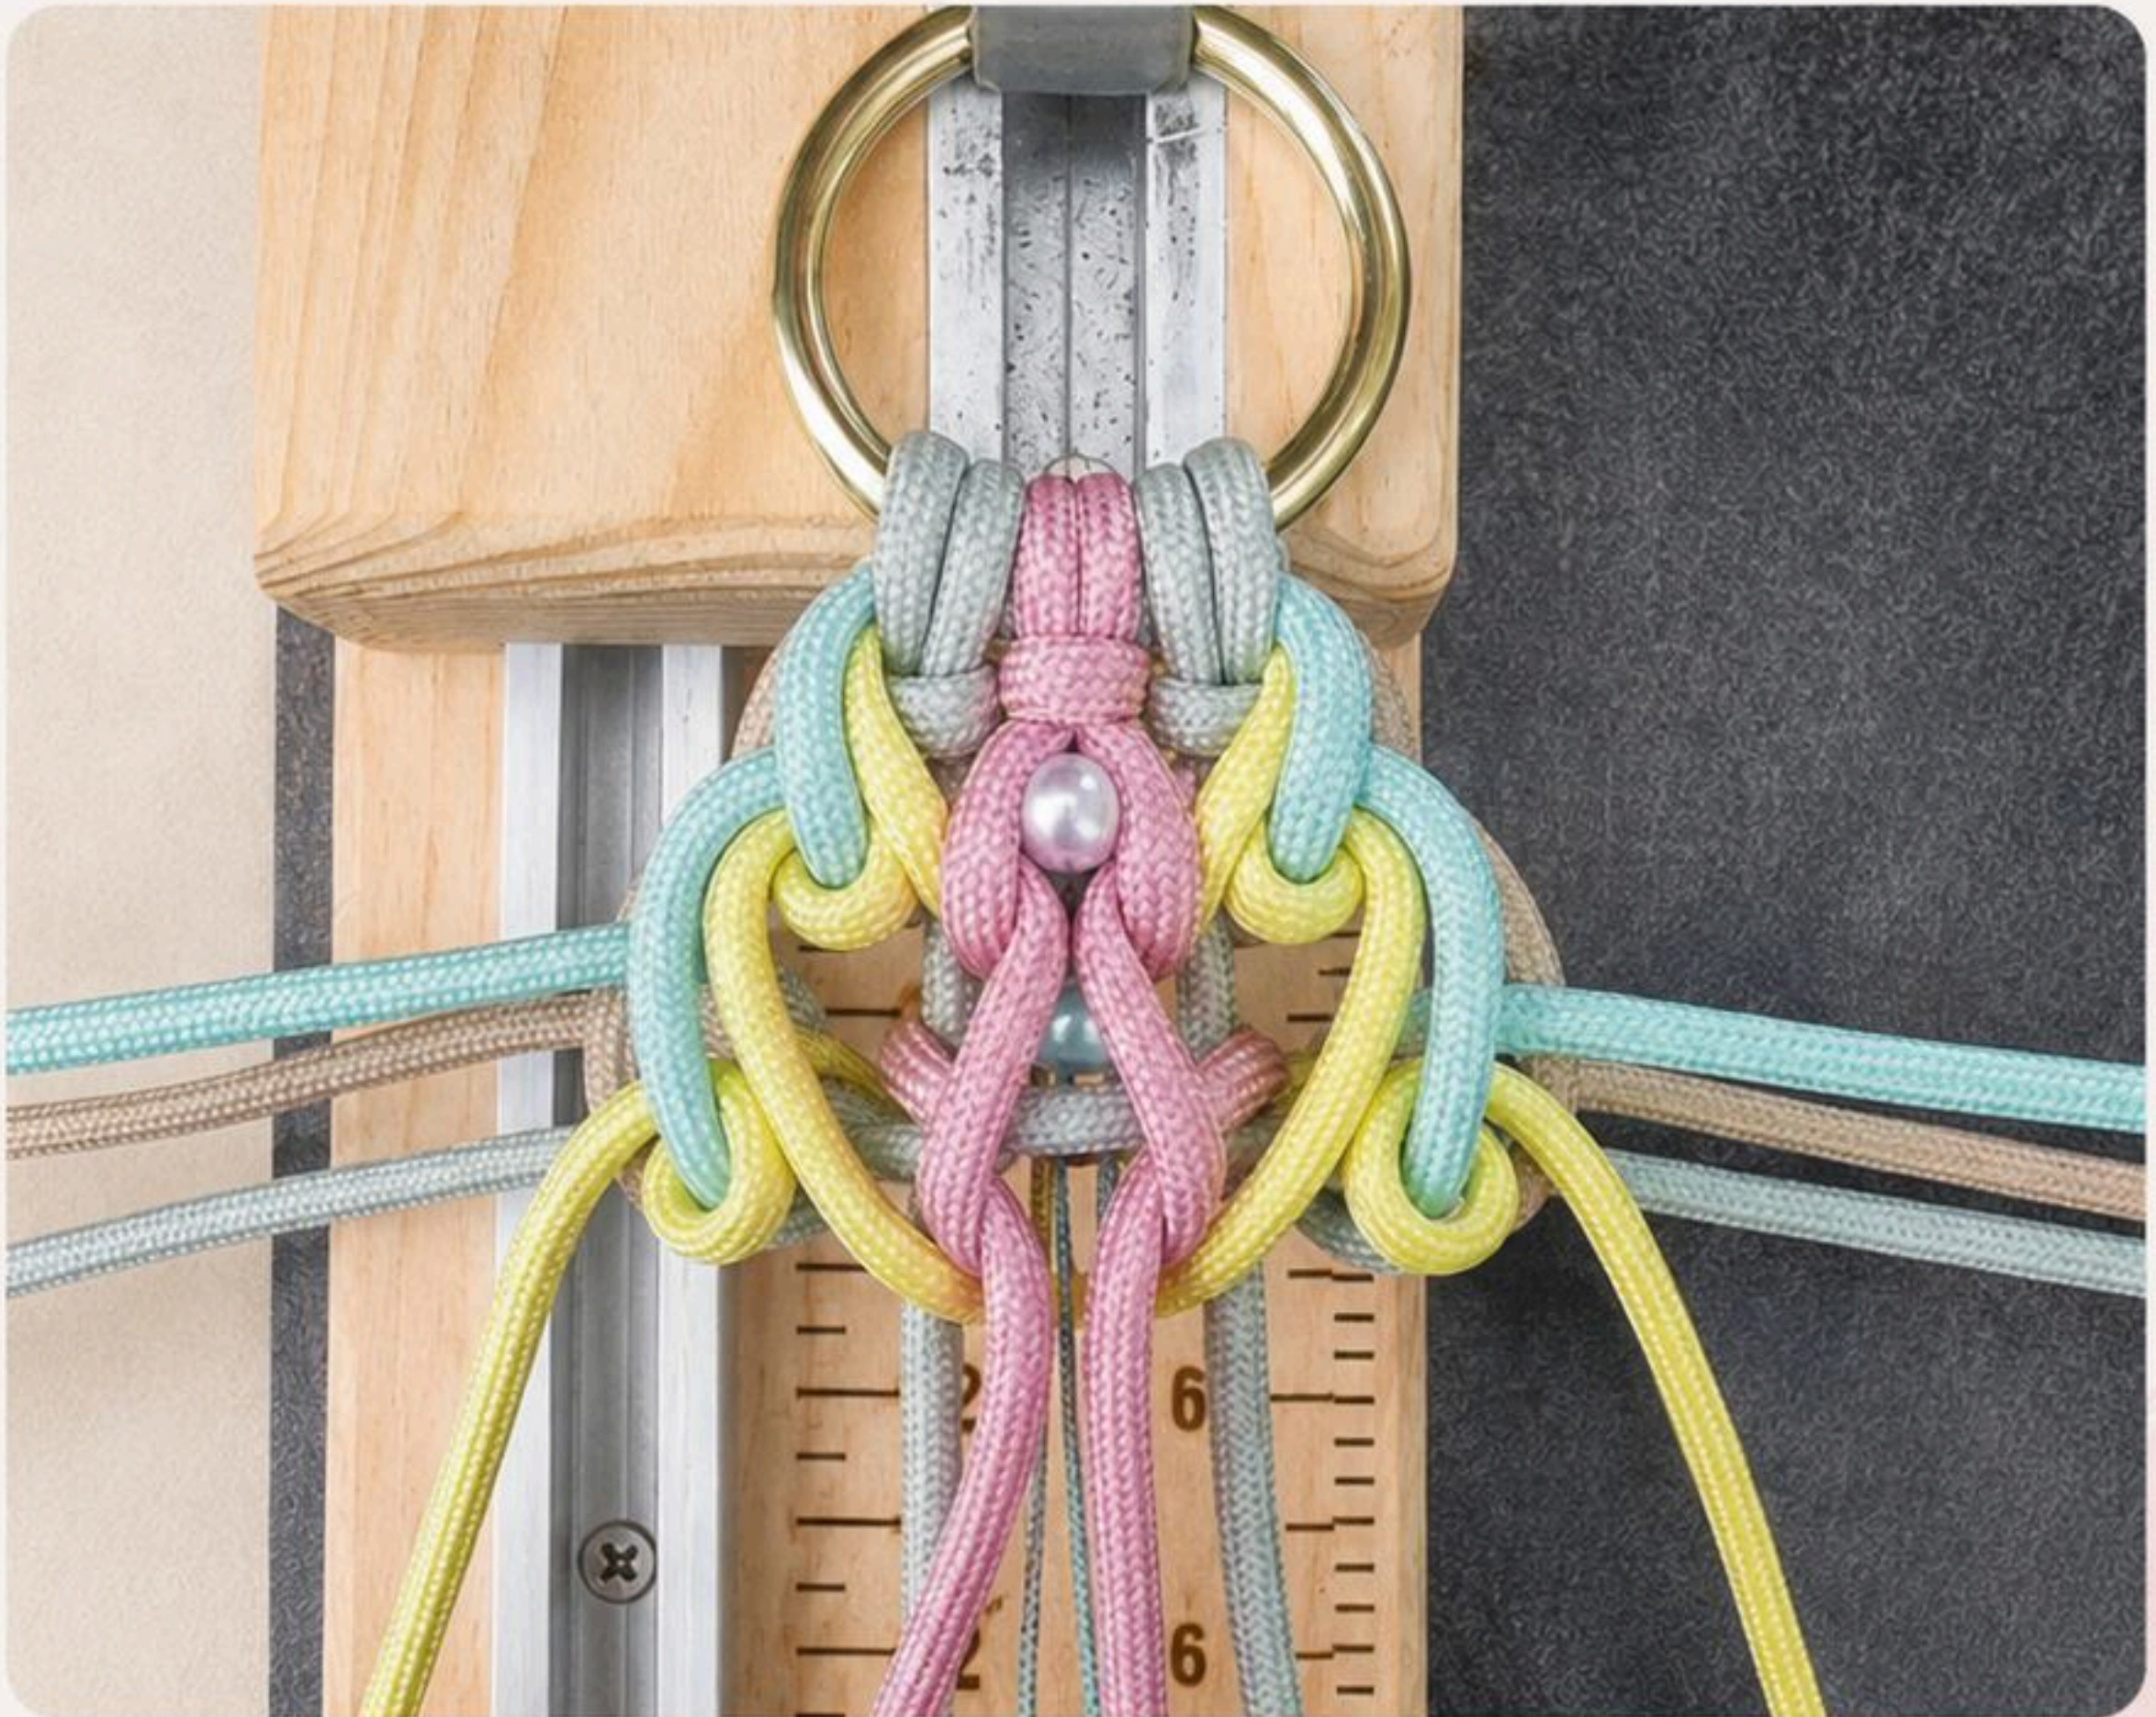

Step 13

Complete this section

You've finished the thirteenth step! This section is complete.
Keep the cords in place and prepare for the next section.

Steps 14–16

Step 14

Continue building the side detail. Guide each cord into place and keep the loops even.

Step 15

Pull the working cords through and tighten gently. Keep both sides balanced.

Step 16

Cross the lower cords to form the next base for the center weave.

Step 17

Cross the yellow cords over the light blue cords and bring them down through the center, forming front loops on each side.

Step 18

Bring the pastel yellow cords up and around the front loops, then thread them down through the gaps to create the next layer of loops.

Step 19

Pull both pastel yellow cords down evenly to tighten the knots and secure the pattern in place.

Steps 20–22

◆ Step 20

Follow the pattern to form the next layer of side loops.

◆ Step 21

Continue tightening and shaping the knots to create a balanced design.

◆ Step 22

Add the final details and tighten everything securely.

Finished Collar & Suppliers

◆ List of materials and suppliers

5 colors of 550 paracord and 1 string of beads (Color 1: silver gray, color 2: cream, color 3: pastel blue, color 4: pastel yellow, color 5: pastel pink and color 6: gray).

Beads, side-release buckle,

20mm D-ring, adhesive tape

measuring tape, scissors, lighter

Remember that we have a complete list of suppliers in the *'Lists'* module.
