MEASUREMENT LOGIC

1 LONG STRAP (adjustable range)

This strap forms the adjustable length.

2 SHORT STRAP (hardware end)

Connects to the buckle and D-ring.

3 MONOGRAM ZONE

NOTE:

Keep the monogram panel inside the safe zone so it stays fully visible after assembly.

TIP:

A single centered monogram patch is the easiest to sew neatly and sell consistently.

MICRO-STEPS

- 1** Measure and cut the long and short webbing.

- 2** Seal the cut webbing ends lightly with a lighter or Fray Check.

- 3** Cut the long and short fabric strips.

- 4** Cut matching interfacing pieces.

- 5** Cut the monogram patch rectangle and a slightly larger piece of stabilizer.

- 6** Keep each size grouped and labeled.

SAFETY NOTE — SEAL WEBBING ENDS

GOOD SEAL:
smooth, slightly melted end that won't fray.

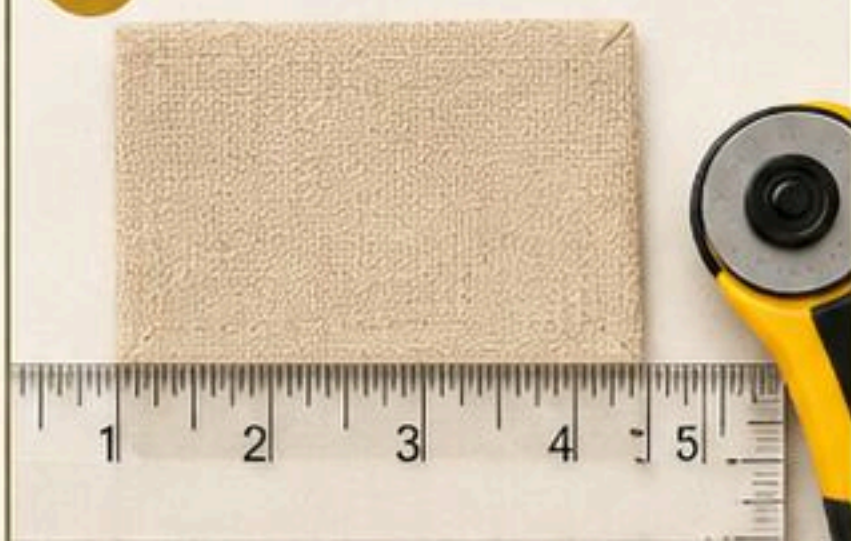

TOO MUCH HEAT:
burnt, hard, or brittle end that can weaken or fray.

Step 2 – Make the Monogram Panel

Prepare the stitched personalization panel
before attaching it to the collar strip.

1

Cut the patch rectangle to
the size for your collar.

2

Press all four raw edges under
by about 1/4 in to create the
finished patch size.

3

Mark centerlines on the patch
and place embroidery stabilizer
behind it.

4

Trace or mark the monogram
letter M centered on the patch.

5

Stitch the monogram neatly
with satin stitch or dense
decorative stitching.

6

Press the finished patch flat
and check that the edges
stay folded under.

• PATCH SIZES •

♥ **Small:**
cut 2.5 x 1.25 in →
finishes about 2 x 0.75 in

♥ **Medium:**
cut 3 x 1.25 in →
finishes about 2.5 x 0.75 in

♥ **Large:**
cut 3.5 x 1.25 in →
finishes about 3 x 0.75 in

• MONOGRAM TIP •

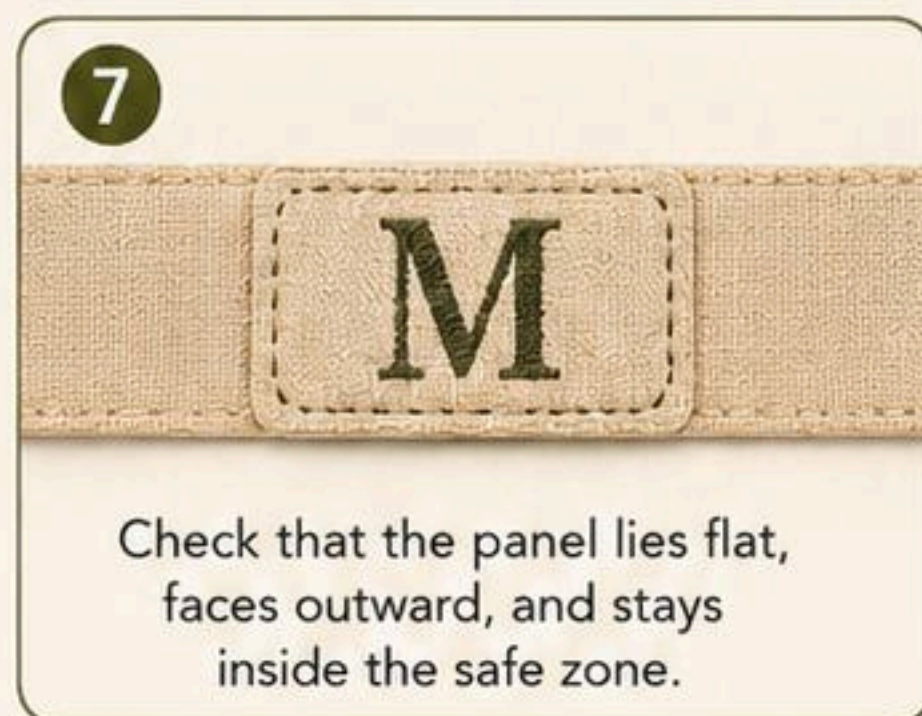

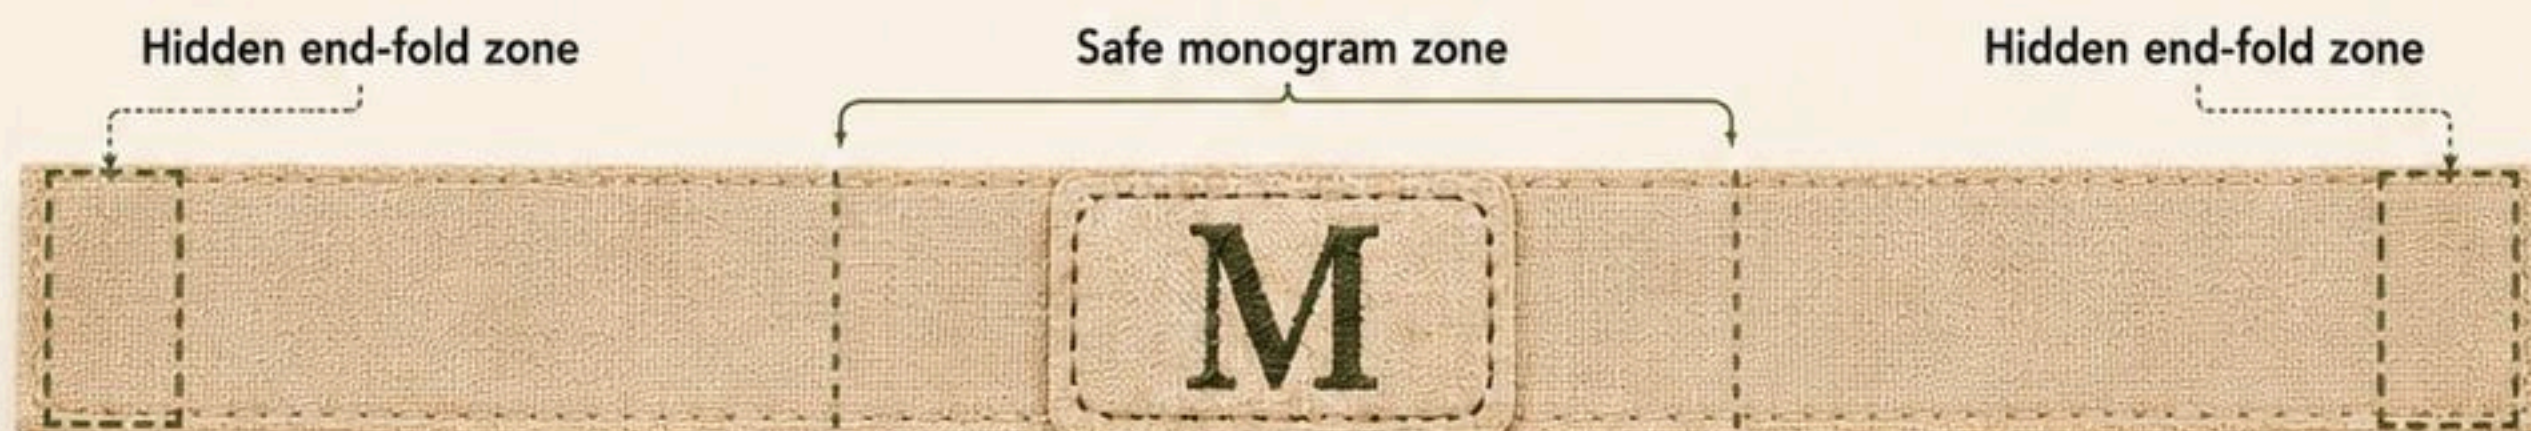

Keep the letter
centered and simple
for a clean
sellable look.

• PREVIEW •

Step 3 – Place & Stitch the Monogram Panel

Sew the finished panel onto the long strip while the strip is still flat.

• FINISHED EXAMPLE •

NOTE:

Attach the monogram panel before turning the strip into a sleeve — this is easier and cleaner.

TIP:

Use matching thread for a subtle look or contrast thread for a decorative boutique style.

Step 4 — Sew the Fabric Sleeves

Turn the outer fabric strips into neat covers for the webbing.

LONG STRIP

SHORT STRIP

1

Fold each strip lengthwise, right sides together.

2

Stitch the long edge with about a 1/4 in seam allowance.

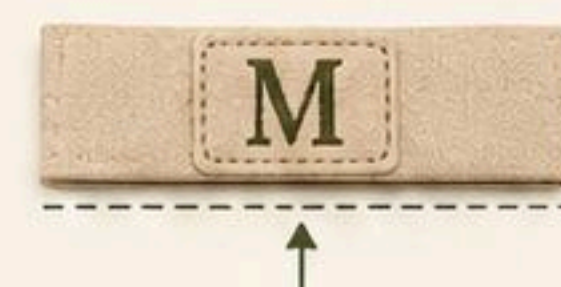

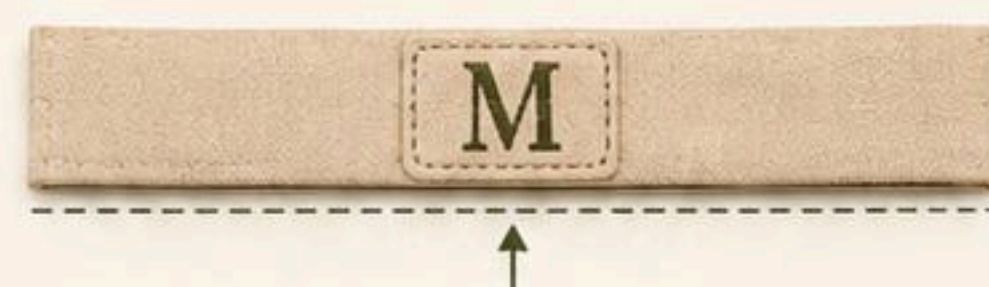

3

Turn the tubes right side out.

4

Press flat with the seam centered on the underside.

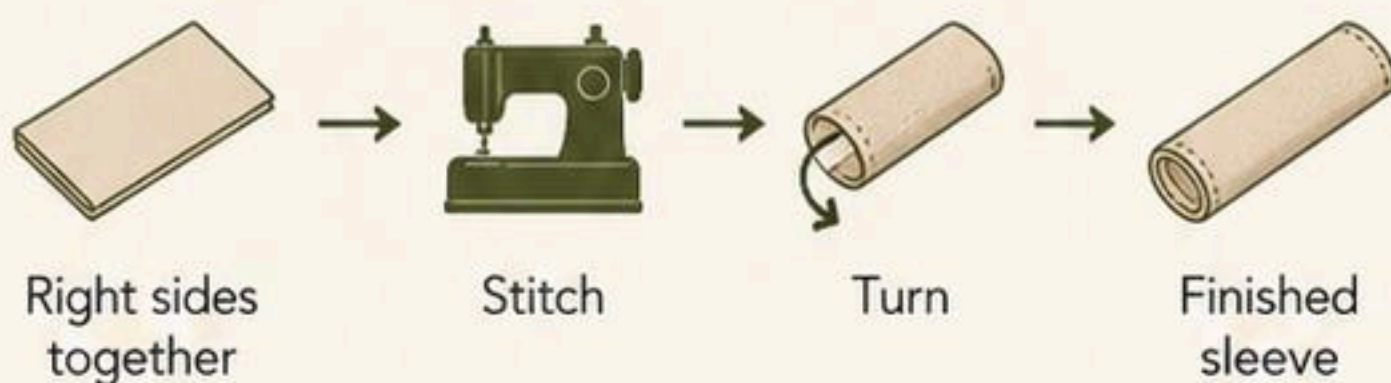

5

Confirm the long strip shows the monogram panel centered on the front side.

AT A GLANCE

TIP

A loop turner, safety pin, or hemostat can help turn narrow tubes.

Step 5 – Insert the Webbing & Topstitch

Slide the strong inner strap into each sleeve and
secure the cover in place.

LONG STRAP (WITH MONOGRAM PANEL)

SHORT STRAP (HARDWARE END)

• FOLLOW THESE STEPS •

- 1 Slide the long webbing into the long fabric sleeve.
- 2 Slide the short webbing into the short fabric sleeve.
- 3 Keep the seam on the underside of each strap.
- 4 Fold the extra 1/2 in fabric at each end inward to hide raw edges.
- 5 Topstitch near both long edges to hold the fabric smoothly around the webbing.
- 6 Topstitch the short ends closed.

NOTE:

The monogram panel should stay centered and face outward on the long strap.

TIP:

Use clips instead of pins when the layers feel thick.

Step 6 — Attach the Hardware

Build the buckle end and the adjustable side exactly in this order.

A) SHORT STRAP (buckle end with D-ring)

- 
Slide one buckle half onto the short covered strap.
- 
Add the D-ring.
- 
Fold the strap end back by about 1.5 in.
- 
Sew a strong box-X stitch to lock it.
- 
The D-ring should sit between the buckle and the stitch line.

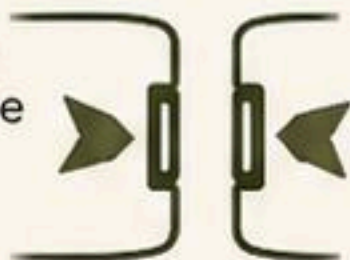

B) LONG STRAP (adjustable side)

- 
Thread one end of the long covered strap through the center bar of the tri-glide slider.
- 
Fold that end back by about 1.5 in and stitch securely to anchor the slider.
- 
Take the free end and thread it through the other buckle half.
- 
Bring the free end back through the tri-glide to create the adjustable section.
- 
Make sure the monogram panel faces outward when the collar is closed.

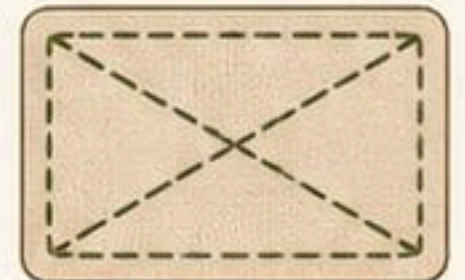

⚠ CAUTION

Always check the buckle direction before sewing. Both halves must face inward so the collar can be fastened correctly.

✦ STITCH NOTE

Use a strong box-X stitch at all stress points to keep hardware secure and the collar durable.

Step 7 — Finish, Adjust & Quality Check

Test the collar, confirm the size range,
and make sure it is ready to sell.
